

STATE OF CALIFORNIA  
REGIONAL WATER QUALITY CONTROL BOARD  
SAN FRANCISCO BAY REGION

STAFF SUMMARY REPORT (Laurent Meillier)  
MEETING DATE: August 13, 2008

ITEM: 5.G

SUBJECT: **Advalloy, Inc. and East Charleston, Inc., for the property located at 844 East Charleston Road, Palo Alto** – Adoption of Final Site Cleanup Requirements

CHRONOLOGY: January 1990 – Initial Site Cleanup Requirements Adopted  
November 1995 – Revised Site Cleanup Requirements Adopted

DISCUSSION: The Tentative Order would set cleanup standards for the site and require the dischargers to complete the site investigation, implement their cleanup plan, and conduct a five-year evaluation of cleanup effectiveness.

We recommend continuance of this item to allow for more time to meet with the dischargers and interested parties to discuss their comments on the Tentative Order. We received comments from one of the dischargers (East Charleston) requesting that we add a prior occupant as a discharger, and from a downgradient interested party (Ford Motor Company) requesting additional offsite investigation and cleanup.

RECOMMEN-  
DATION: Continue the item to a future Board meeting
