Subject: Comments on Strategic Plan Update 2008-2012

Dear Ms. Townsend and Members of the State Water Resources Control Board:

The Dublin San Ramon Services District has reviewed your draft Strategic Plan Update for 2008-2012 and applauds the State Board for your long-term vision contained in this Strategic Plan for the resolution of the many water issues facing the State of California. We are particularly supportive of the goals, objectives and actions listed in Program Priority for Water Use Efficiency as they apply to maximizing the use of recycled water throughout California and removing impediments to the implementation of recycled water projects. Recycled water is one of several key elements of a solution to the State water crisis

The Dublin San Ramon Services District (DSRSD) is a partner with East Bay Municipal Utility District (EBMUD) on a large scale recycled water project for the San Ramon Valley in the San Francisco Bay Area. We hope through this project to be able to ultimately deliver near 6,000 acre feet of recycled water for irrigation purposes to the community that both agencies serve. We believe the goals, objectives and actions that you identify in your draft Strategic Plan will facilitate our ability to meet our project objectives and thereby improve the reliability of the water supply for both DSRSD and EBMUD and make a contribution to the solution of the overall water situation in the State of California.

If you have any questions on this, please do not hesitate to contact me.

Sincerely,

BERT MICHALCZYK
General Manager
Dublin San Ramon Services District

cc: Dennis Diemer, EBMUD
