Subject: Unimpaired flows

Dear Chair Marcus and other members of the State Water Board,

I know that you planning to release an updated Substitute Environmental Document for the Bay Delta Water Quality Control Plan and I am writing to urge you to support a high level of unimpaired flows - at least 50% and ideally 60% - in the lower San Joaquin River between February and June. Fish and other wildlife need that level of flow in the river to survive and thrive!

Please do the right thing for the health of our natural environment.

Thank you,

Michael Closson
