**Subject:** Don't squeeze our farmers

State water board,

Your plan to increase unimpaired flows on the Stanislaus River would force farmers to pump more -- which you say you don't want them to do. It places an unethical and unfair burden upon agribusiness and farmlands in our valley. The hypocrisy of this plan demonstrates that even the local government is out of touch with reality and is yet another example of real damage of intrusive legislation run amok.

Respectfully,

Brandon Renfro
