Dear Sirs:

Your proposal to divert 35% of the water flowing down the Stanislaus, Merced, Tuolumne, and Merced rivers is absolutely insane! To "conflow" to a small group of environmentalists is going to hurt not only the farmers, but all the people that maintain the farms and work in the harvest. It will hurt all the hundreds of people that

(2)

are associated in the food industry, including grocery stores, trucking, and consumer's higher food prices.' It will also be devastating to our country's food supply.

I strongly oppose your proposal and hope you realize how many people you will be hurting if you support this legislation.

Sincerely,
Mr. Thomas Langstaff
