

Dear Chairman Felicia Marcus,
I enjoy spending time recreating on California rivers and want more Californians to enjoy these rivers as well. I am writing to urge you to support higher flows into the San Joaquin Delta, historically, populations of spawning Salmon may have exceeded 400,000 fish but has recently plummeted. I would like to see the return of higher salmon populations on our rivers to both return river health, but also protect our Salmon populations for the fishing industry.

Sincerely,

Cynthia Baricovic
