Subject: Your plan would hurt rural residents

Water board members,

I am very much against increasing unimpaired flows on the Stanislaus and other rivers.

We have, for decades, learned to live with our water storage, with the numerous dams that save our water for agriculture and homes.

We live in the country. Our water, which we depend on for our needs, was indeed a scary thing these past few years. Due to the drought, we were very afraid that the farmers' deep wells, which they would use for their crops, would pull our well dry.

Please, do not do this. It would be devastating to California and the people that have called it home all of our lives.

Respectfully,

Olivia Esteves
