Subject: Our farmers feed the world

Water board members,

We don't have enough water as it is. Don't send it out to sea by raising unimpaired flows on the Stanislaus River. That's nuts. Speaking of nuts: our farmers supply lots of jobs, food and money into our local economy. Nuts, grapes, berries, grain, corn, beans and more food that helps feed the world. We need to build dams and a system to get the most use of our water.

Thank you.

Gene Wood
