Subject: No more wasted water on the Stanislaus

State water board,

I oppose any further flushing of water down the Stanislaus River. My family lives in Manteca, one of the many cities affected by the senseless waste of water being carelessly sent out to the ocean! OID and SSJID have for many years taken very careful steps to protect our water, not only for agriculture but for the thousands of people as well who live in this area and depend on that same groundwater for our daily use! The State Water Board should use their collective brains and allow the people who KNOW WHAT'S BEST handle this situation! That goes for the ridiculous Twin Tunnels fiasco as well!

Respectfully,

Lynn Allen
Manteca
