WHAT IS eWRIMS?

The Electronic Water Rights Information Management System (eWRIMS) was developed to track information about water rights in California. eWRIMS contains information on appropriative water rights and claimed riparian and pre-1914 water diversions. In addition, water rights are viewable on the eWRIMS Geographic Information System (GIS).

WHAT INFORMATION CAN I FIND IN EWRIMS?

Public users can view summary information on individual water rights or download data sets based on search criteria.

Search for details about water rights by:

- Water right status
- Water right type
- Primary owner
- Water right ID (application, permit or license number)
- Watershed, county, or source of the water

GEOGRAPHIC INFORMATION SYTEM INTEGRATION (GIS)

The eWRIMS GIS displays real-time data by:

- providing a printable graphic display of Points of Diversion (PODs)
- moving between the data application and mapping functions for easy searches
- mapping for upstream and downstream POD searches
- displaying fully-appropriated streams to determine if water is available
- providing usgs quadrangle and aerial photograph layers

REPORT MANAGEMENT SYSTEM INTEGRATION

Diverters with appropriative water rights, statements of water diversion and use and groundwater recordations are required to report their diversions annually through the online report management system. These reports are publically available in eWRIMS under the link "View Reports" on the search results screen.
