RE: Proposed Revocation of Masonite License

Dear Sirs:

The Calpella County Water District, Hopland Public Utility District and the Willow County Water District have been following the efforts of the Millview County Water District to preserve the Masonite water right. We feel that with the Russian River fully appropriated, the loss of this major water right for Mendocino County would be a major blow.

We urge you to use your discretion to preserve this important water resource for our economy and the quality of life.
