

2015 ANNUAL REPORT

Mendocino County Russian River Non-Main Stem Diverters Water Demand Management Program.

Introduction

The Water Demand Management Program (WDMP) for the Mendocino County Russian River Non-Main Stem Diverters was submitted to the State Water Resources Control Board (RWQCB) on February 1, 2015. The SWRCB approved this WDMP on February 13, 2015. The Governing Body, the California Land Stewardship Institute (CLSI) completed an inventory of vineyards and orchards that use water for frost control. This initial inventory was submitted to the SWRCB on March 15, 2015 and was updated on May 14, 2015. This is the first annual report for this program.

Requirements

The regulation requires the Governing Body to submit an annual report to the State Board by September 1 and defines the information required in the report. Resolution #2011-0047 was passed by the State Board at the same time as the regulation and it addresses the First Annual Report including:

“The State Water Board does not anticipate that the stream stages needed to prevent stranding mortality will be determined prior to the first annual report but work will have begun towards their development.... The State Water Board expects the first annual report will contain updates to the inventory, including information required pursuant to subdivision (c)(1)(E) of the regulation, stream stage monitoring data, and the governing body’s progress towards development of protective stream stages, but it is not anticipated that there will be enough stream stage monitoring data....to conduct a risk assessment or to evaluate whether corrective actions are needed.”

Frost Inventory

Appendix 1 is the frost inventory for all sites using water for frost control in the Mendocino County portion of the Russian River watershed not including main stem Russian River diverters. This inventory also includes reported diversion data for the frost season of March 15 to May 15, 2015. As required by the regulation, the rate of diversion, hours of operation and the volume of water diverted per frost event are listed.

There were several changes in the inventory. Blanc Vineyards, Obrien Ranch – Blanc Vineyards, Frey – Road I ranch and Frey – West Road Ranch were dropped from the program as they use only Redwood Valley County Water District water.

Ghianda Rose, Larramendy and Saracina vineyards all managed by Peter Chevalier, Schrader Vineyards and Rich LaMalfa – Russian River were dropped as they are in the mainstem WDMP.

Dempel Ranch and Omnium Vineyards dropped out of this WDMP because they say they are in the Sonoma County WDMP. However the Sonoma County WDMP does not accept Mendocino sites.

In general, in 2015 there were few frost events and many diverters did not use any water for frost control. Despite many requests from us there are a few sites that did not report their frost water usage and have no information included in the table.

Stream Stage Monitoring

In accordance with the approved WDMP, we monitored stream stage on McNab Creek in 2015 using a network of three gages (Figure 1).

The gaging network consists of:

McNab Gage 1 a bubbler gage with an accuracy of 0.02 feet

McNab Gage 4 a global water pressure transducer gage with an accuracy of .03 feet

McNab Gage 8 a bubble gage with an accuracy of 0.02 feet

Each continuous recording gage records at 15 minute intervals. There is an outside staff gage at each station for visual measurement of water levels to provide QA/QC to the instrument readings.

The time/date/stage data for the three gages is contained in Appendix 2. There were some technical problems with McNab Gage 1 for a portion of the frost period.

Frost diversions occurred in the McNab Creek watershed on six days in April 2015. These days include:

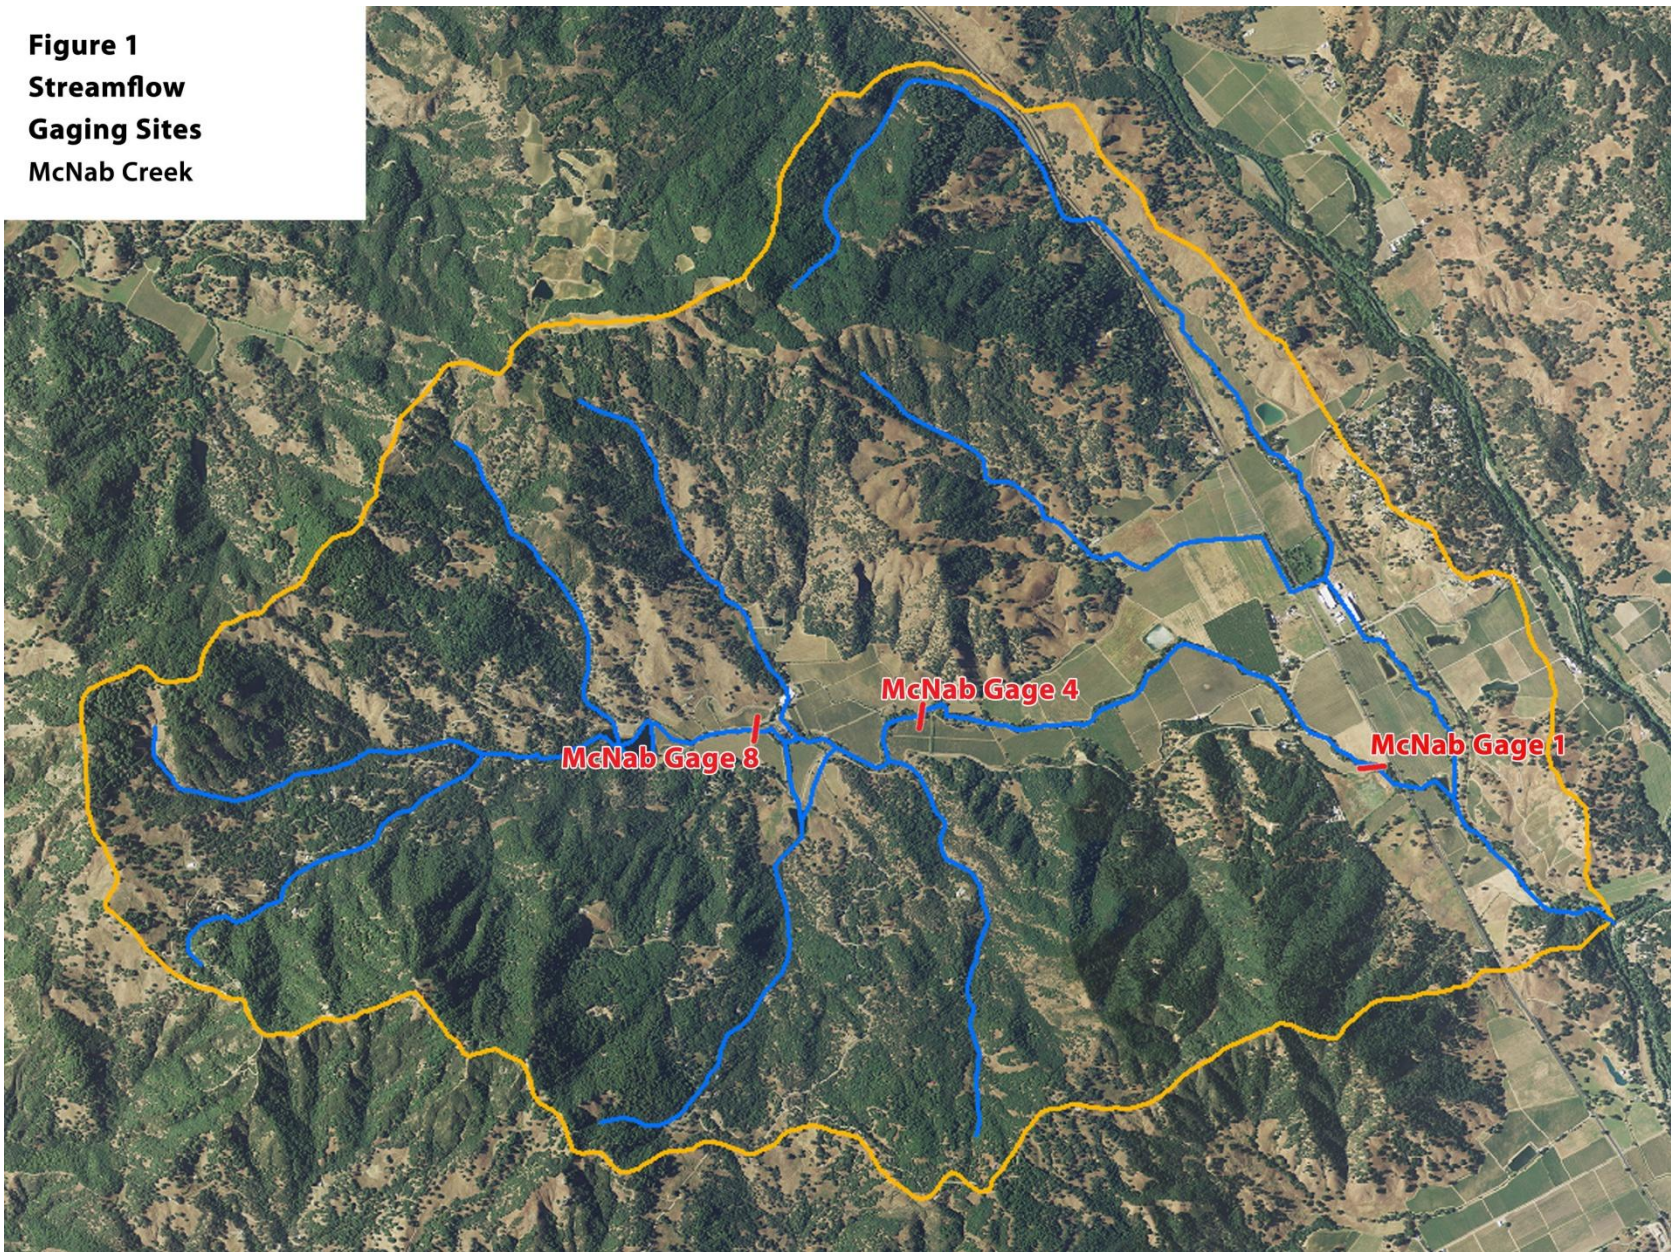

4/1/2015	1-2 hours
4/2/2015	1 hour
4/3/2015	1.5-2 hours
4/6/2015	2-6 hours
4/8/2015	5 hours
4/10/2015	1 hour
4/13/2015	1.5-2 hours

There are no indications of a sudden change in the stream stage at the times of the frost diversions at any of the gages. Frost diversions were made from reservoirs only; no direct diversions from the creek occurred.

As part of maintaining the gages, we resurveyed cross sections at each gage to assure accuracy.

In accordance with the WDMP, we will install a gaging network in the Dooley/McDowell Creek watershed for the 2016 frost season, and will maintain the McNab Creek network.

Streamflow
Gaging Sites
McNab Creek

Risk Assessment

We have begun work on the risk assessment for McNab Creek. We need to collect additional gaging data to determine stranding risk.

Corrective Action Plan

There are no corrective action plans.

Instances of Non-Compliance

There were no instances of non-compliance.

Consultations

We consulted with CDFW on the WDMP. The McNab Creek gaging network was installed in 2012 prior to the WDMP. We will consult with CDFW on the Dooley/McDowell Creek gaging network. We have not heard back from NMFS on our request for consultation on the WDMP but will contact them again.

Revisions on Changes to WDMP

It is too early in the process of implementing the WDMP to determine the effectiveness of the WDMP or recommend any changes.

APPENDIX 1 FROST INVENTORY WITH 2015 FROST SEASON DIVERSION RECORDS

Mendocino County Russian River Non-Main Stem Diverters Water Demand Management Program 2015 Frost Inventory with Diversion Information								
Diverter ID	Location of diversion - APN #	Date	Time frost water turned on	Time frost water turned off	Source of water	Rate of diversion (in gallons per minute)	If using off stream pond: when was pond refilled?
