Subject: Comment: Klamath Hydroelectric Project Relicensing Scoping session 1/25/16

Dear Parker,
Thank you for the well-organized scoping session which I attended last night at the Arcata D Street Neighborhood Center.

As I needed to leave early (6pm), I turned in my blue card with a written comment on it to your staff at the door. I told her (and wrote on the blue card) clearly that I would not be making an oral statement, that the blue card was my written statement submitted. However, I heard later that my name was announced twice to speak (after I had departed). My apologies for the confusion.

Now I just want to make sure my written comment has been received: like the 30 presenters at last night's session, for all of their reasons and the MANY (too many!!) studies and arguments over 10 years in favor of dam removal for water quality, environmental, cultural, economic, and aesthetic reasons, I concur: **Please do what it takes to fully remove all 4 Klamath dams.**

Thank for receiving my comment.
