UPPER NORTH FORK FEATHER RIVER HYDROELECTRIC PROJECT
WATER QUALITY CERTIFICATION

State Water Resources Control Board

Your input is important to us; please use this comment sheet to provide input on issues, alternatives and mitigation measures to be evaluated in the Draft EIR. Your comments will assist in preparation of the Draft EIR. Please include your name and address below to receive a copy of the Draft EIR.

Lake Almanor is not a cold water lake even in the best of conditions. What happens in a drought year? Has a study been done that documents the drought periods that have occurred in California for the past 50 years? If not - why not?

Another question I have is who or what is behind the decision to raise the water temperature downstream? Has the water temperature risen over the past decade, making it necessary to "return" to previous temperatures? Or is this a new idea to change what has been a natural condition since the creation of Lake Almanor.

Additional space? Please use other side.
