

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 94-83

APPROVAL OF ADDITIONAL STATE REVOLVING FUND LOAN FUNDING
FOR THE EAST BAY MUNICIPAL UTILITIES DISTRICT'S
SAN ANTONIO CREEK WET WEATHER TREATMENT FACILITY
PROJECT NO. C-06-4003-480

WHEREAS:

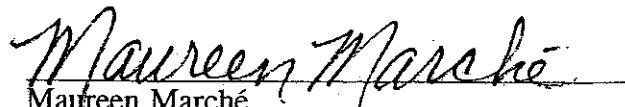

1. The State Water Resources Control Board (SWRCB), on August 18, 1988, adopted the "Policy for Implementing the State Revolving Fund for Construction of Wastewater Treatment Facilities", and amended it on September 20, 1990, January 21, 1993, and September 23, 1993;
2. The SWRCB, on September 17, 1992, adopted the FFY 1993 SRF Loan Program Priority List which includes the East Bay Municipal Utilities District's San Antonio Creek Wet Weather Treatment Facilities project;
3. The Division of Clean Water Programs has approved the project report, environmental documents, revenue program, and plans and specifications for the San Antonio Creek Wet Weather Treatment Facility;
4. The SWRCB, on April 27, 1993, adopted Resolution No. 93-34 approving a \$15.1 million SRF loan for the San Antonio Creek Wet Weather Treatment Facility; and
5. The Division of Clean Water Programs has determined that the total eligible project cost for the San Antonio Creek Wet Weather Treatment Facility is \$15.8 million.

THEREFORE BE IT RESOLVED THAT:

The State Water Resources Control Board approves an additional \$700,000 in SRF loan funding for the EBMUD San Antonio Creek Wet Weather Treatment Facility, SRF Project No. C-06-4003-480, with a repayment period of twenty (20) years, and the first payment due one (1) year after completion of construction.

CERTIFICATION

The undersigned, Administrative Assistant to the Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on September 22, 1994.

Maureen Marché
Administrative Assistant to the Board

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 93-34

APPROVAL OF STATE REVOLVING FUND LOAN
FOR THE EAST BAY MUNICIPAL UTILITIES DISTRICT'S
SAN ANTONIO CREEK WET WEATHER TREATMENT FACILITIES PROJECT

WHEREAS:

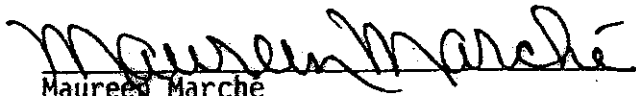

1. The State Water Resources Control Board, on August 18, 1988, adopted the "Policy for Implementing the State Revolving Fund for Construction of Wastewater Treatment Facilities", and amended it on September 20, 1990 and on January 21, 1993;
2. The State Water Board, on September 17, 1992, adopted the FFY 1993 SRF Loan Program Priority List which includes the East Bay Municipal Utilities District's San Antonio Creek Wet Weather Treatment Facilities project;
3. The Division of Clean Water Programs has approved the project report, environmental documents, and revenue program for the San Antonio Creek Wet Weather Treatment Facilities project; and
4. The information contained in the program EIR and Negative Declaration/Initial Study (State Clearinghouse No. 92013017) prepared for the proposed project has been reviewed and considered, and it has been determined that:
 - (a) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen potentially significant environmental impacts identified in the environmental documents with respect to the following aspects of the project: (1) erosion and short-term water quality impacts will be mitigated by following ABAG standards, restoring disturbed areas, preparing a geotechnical report to develop further recommendations, preventing sedimentation, and working with local agencies; (2) impacts to flood control channels will be mitigated by working with the Alameda Flood Control and Water Conservation District and the City of Oakland; (3) impacts to vegetation will be mitigated by replacing trees and restoring disturbed areas; and (4) aquatic habitat impacts will be mitigated by minimizing the area of disturbance.
 - (b) With respect to the other potentially significant environmental impacts identified in the EIR, Negative Declaration and Initial Study, appropriate changes or alterations are within the jurisdiction and responsibility of other public agencies, and such other changes or alterations have been adopted, or can and should be adopted, by other public agencies.

THEREFORE BE IT RESOLVED THAT:

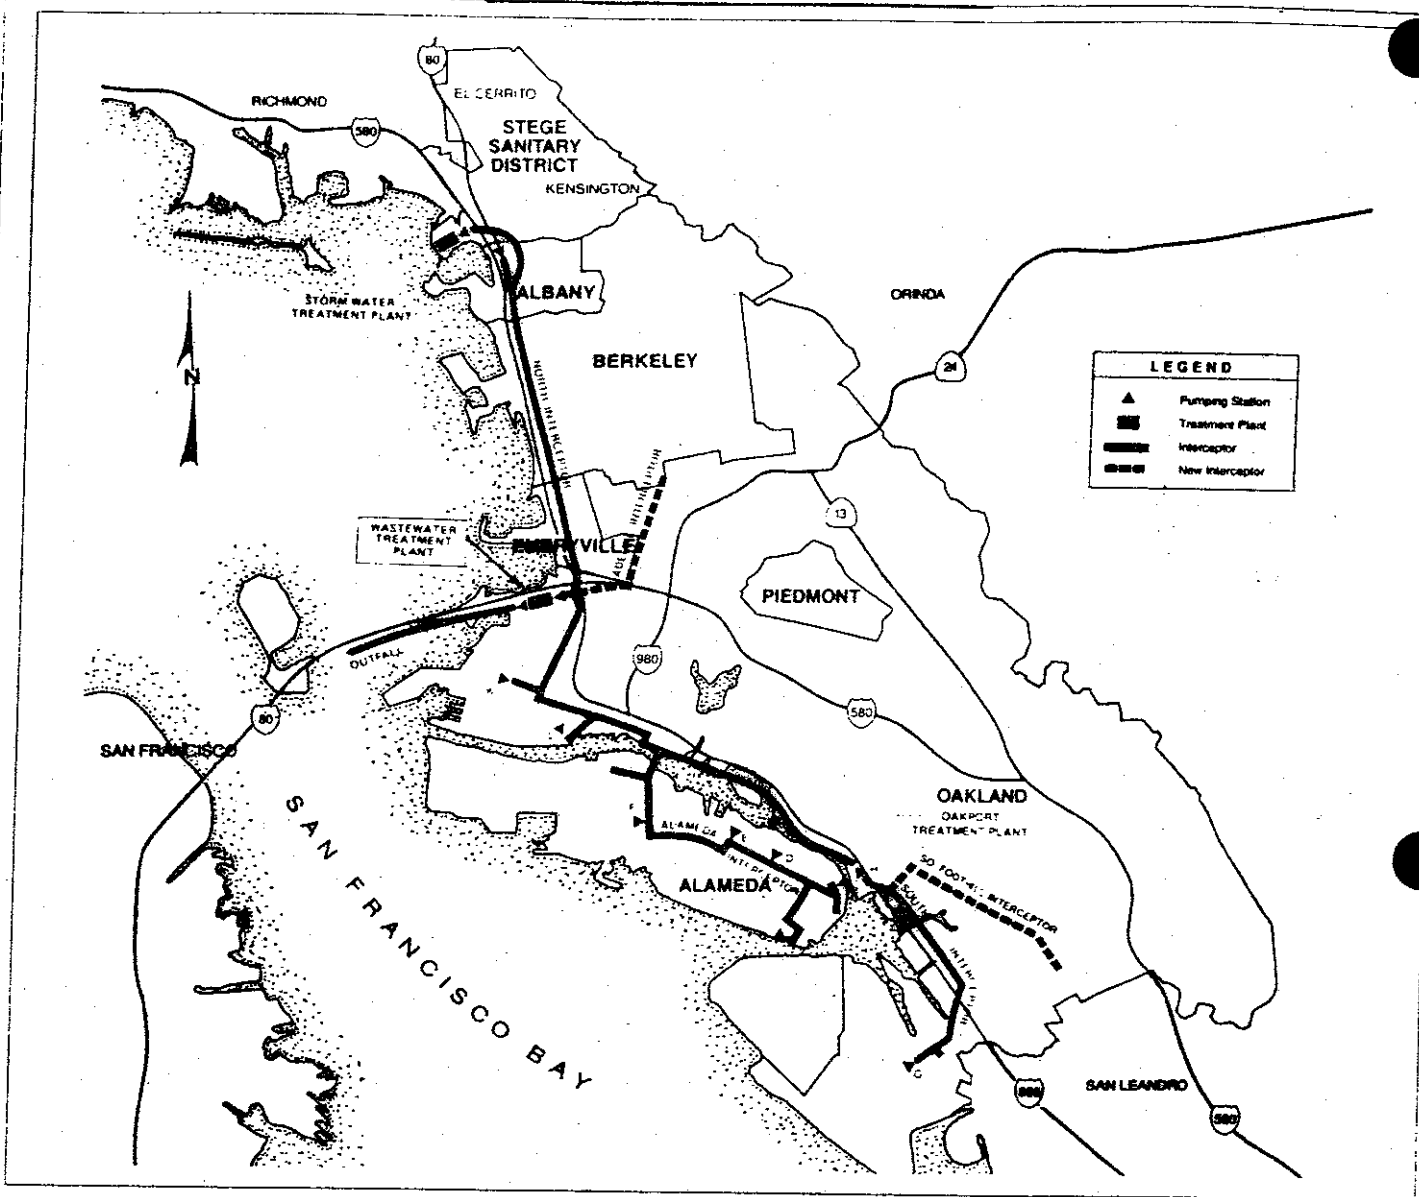

The State Water Board approves a SRF loan of \$15.1 million for the EBMUD San Antonio Creek Wet Weather Treatment Facilities project, with a repayment period of twenty (20) years, and the first repayment due one (1) year after completion of construction.

CERTIFICATION

The undersigned, Administrative Assistant to the Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on April 27, 1993.

Maureen Marche
Administrative Assistant to the Board

SPECIAL DISTRICT No. 1

The East Bay Municipal Utility District Wastewater Department was created in 1944 as Special District No. 1 (SD-1) with responsibility for treatment and disposal of all domestic, commercial, and industrial wastewaters from Alameda, Albany, Berkeley, Emeryville, Oakland, Piedmont, and the Stege Sanitary District (consisting of El Cerrito, the Richmond Annex, and the Kensington area). The individual communities operate the collection system sewers which discharge to 1 of the 3 District-operated intercepting sewers. The Wastewater Department is responsible for the administration and operation of SD-1. The Department also operates the District's joint water and wastewater laboratory and the wastewater reclamation facilities.

The Wastewater Department is organized into 4 functional divisions: Wastewater Treatment; Support Services (engineering); Laboratory Services; and Source Control. Department staff increased by 13 in

1991 to 308 full-time equivalent positions (See organization chart on page 3.)

The following elements characterize the District's wastewater service area.

- 611,000 residential customers
- 20,000 business and industrial users
- 83 square mile area
- 1,800 miles of community-owned and maintained sewers
- 13 pumping stations
- 22 miles of intercepting sewers from 42 inches to 9 feet in diameter
- 3 treatment plants with a peak capacity of 448 million gallons per day (MGD)

The official financial data for wastewater services are included in the EBMUD Annual Report which is available from Public Information, EBMUD, P.O. Box 24055, Oakland, CA 94623.
