## 08/04/10 BD MEETING – ITEM 13 STAFF CHANGE #3 (CIRCULATED 07/30/10)

This Change Sheet covers additional revisions made on the proposed 2010 Integrated Report after June 15 Board meeting. As directed by the State Water Board, staff reevaluated the eleven contentious listing recommendations. This reevaluation included a review of related data and information that were raised in the public testimonies during the June 15 Board meeting. Staff reevaluation resulted in changes in the staff recommendations. The additional changes to the proposed recommendations are described below.

## CHANGES TO THE 303(d) LIST PORTION OF PROPOSED 2010 INTEGRATED REPORT

## 1- Lahontan Region (Region 6)

- 1.1 East Fork Carson River: The listing recommendation for this water body segment has been changed to "Do Not List" for Boron, based on minimum numbers of samples showing exceedences of water quality objectives.
- <u>1.2 Little Rock Reservoir</u>: The listing recommendation for this water body segment has been changed to "Do Not List" for Boron, based on minimum numbers of samples showing exceedences of water quality objectives.
- 1.3 Mammoth Creek (Old Mammoth Rd. to 395): The listing recommendation for this water body segment has been changed to "Do Not List" for Boron, based on minimum numbers of samples showing exceedences of water quality objectives. In addition, one exceedence was identified as a typographical error that resulted in fewer exceedences of the annual average.
- <u>1.4 West Walker River</u>: The listing recommendation for this water body segment has been changed to "Do Not List" for Boron, based on minimum numbers of samples showing exceedences of water quality objectives.
- <u>1.5 Mammoth Creek (Headwaters to Twin Lakes)</u>: The listing recommendation for this water body segment has changed to "Do Not List" for Total Dissolved Solids (TDS). The data for these water body-pollutant combinations showed that they may not be considered temporally representative because the exceedences occurred only in low flow months.
