Subject: San Juan Water reduction requirement mandate voting date

To whom it may concern:

My water district, San Juan Water District, recently informed me that the state wants to pursue restrictions as early as early February. Considering the amount of snowpack we currently have and the recurrent storms from the Pacific, this date is premature to make any mandated restrictions.

I strongly urge you to hold off on any further mandates until April, when we have a better idea of what our reservoir storage is and what the snowpack is at that time.

Sincerely,

Bill Hollister
