

**STATE OF CALIFORNIA
CALIFORNIA REGIONAL WATER QUALITY CONTROL
BOARD CENTRAL COAST REGION**

STAFF REPORT FOR REGULAR MEETING SEPTEMBER 10, 2004

Prepared August 9, 2004

ITEM NUMBER: 11

**SUBJECT: Corrective Action Plan Approval Status Report; Shell-Branded
Service Station; 687 Lighthouse Avenue, Pacific Grove, Monterey
County**

DISCUSSION:

Equiva Services Company, LLC (Equiva) submitted a Corrective Action Plan (CAP) on May 15, 2004. The CAP addresses petroleum hydrocarbon cleanup of soil and groundwater beneath and near the site. The CAP was prepared at staff's request to select appropriate remedial alternatives once site characterization was complete. Equiva evaluated several remedial cleanup alternatives. Based on its evaluation, Equiva proposes implementing Oxygen injection to enhance bioremediation. This remedy is expected to complete the groundwater cleanup. The CAP was approved on June 23, 2004, and a Corrective Action Implementation Plan is expected by July 23.
