In re: Los Osos Community Service
District Sewer Project...

Dear Governor Schwartzenneger:

Your were elected by a mandate of the "will-of-the people". On 27 September 2005, the people of Los Osos, California elected a five person board of directors who are 100% in favor of cleaning up our septic pollution problems with an affordable "mandated" sewage plant located east of town (down wind), in a rural agricultural area. A minority opposing group, which includes large vacant property owners and your delegated State Water Boards are forcing this little community into financial ruin by subverting a decree of the majority vote, in order to overthrow our democratic process with intimidation and fear of ruinous fines and attachments..

A male member of every generation of my famliy have shouldered musket & rifle in each conflict our nation has been engaged since the Revolutionary War. My dad served in the Tank Corps in WWI. My older brother engaged the enemy at Anzio in WWII. My little brother succumbed to 3rd degree burns over 85% of his body as a result his 25th combat mission over the Yalu River as a B29 tail gunner. I am 100% combat disabled as a result of our winter 1951-1952 battle for Heartbreak Ridge, in North Korea.

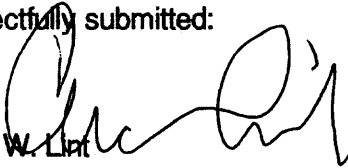

Governor Schwartzenneger, I am retired subsisting on my Veterans Combat Pension and Social Security here in Los Osos. It is beyond my comprehension that our appointed State Water Board can subvert the majority "will-of-the-people" in the democratic society that my family fought so dearly.

For the life of me, I can not understand how our Central Coast Regional Water Quality Board can mandate money penalties on this retirement community while our Federal and State Governments can build sewage treatment plants in Tijuana, Mexico and Iraq, at no cost to 1.

these foreign citizens who have never spent one drop of blood for the liberty of our great nation.

We, the majority of the citizens of Los Osos, implore you to reign in our Water Quality Control Boards and give the majority of citizens of Los Osos a well earned breathing spell to implement an affordable sewage treatment plant out of the center of our small town.

Respectfully submitted:

Curtis W. Lint
