Subject: Sock It To Them!

Dear Roger Briggs,

As a citizen of Los Osos I understand the problems of the Waste Water Treatment facility to be built here in Los Osos at the Tri W site. I have been working hard to get it built, along with the former and sadly recalled CSD members. They wanted and fought a brave battle to get it built. They warned the general population what would happen if it were not started and built in a timely manner. Now the new CSD Board has stopped the project!

They are jeopardizing the community with some very bad advice and are doing so behind an illegal issue called Measure "B." that they refer to as law voted in by the people. As you know the voting margin was very thin. I also know that they are now in negotiations the State, with Sam Blakeslee as the mediator. I would encourage you to "Sock it To Them!"

They have little respect for the state of California or the Water Board, as stated by Julie Tacker and Lisa Schicker as a published fact. They believe that you will bend to their wishes and they can deify you and the members of your boards.

The other three members of the new CSD are also State employees with Cal-Trans.

Why they would want to bite and ignore the hand that feeds them is beyond my comprehension.

Please carry though with the terms that you have already stated when you were here in January. No other community should know of how tolerant you have been to the City of Los Osos, and believe that anyone can get away with none compliance for as long as they wish. They are delaying and hurting the future of it's citizens and the contamination of the natural enviornment and water supply. Thank you for your fine efforts here in Los Osos.
