Re: State Water BORED !!

What a shame that our State Water BORED cannot see the blunders of the plant design that our previous CSD champions approved. Of all the agencies involved in this circus show, the state approved the design of a plant that cannot handle the solids it will produce. How can they approve such a short sighted plan ?? Morro Bay WWTP now composts the solids its citizens produce. Why are we being forced to install a plant/park/amphitheater/dog park with sludge hauled off at extremely high moisture content to another COUNTY? This is the reason why I voted for a new location, because our solids must be handled completely without relying on another county for disposal. WAKE UP STATE AND REGIONAL WATER BORED !!! THINK OF THE FUTURE .
