Lori Okun  
Senior Staff Counsel  
Central Coast Regional Water Quality Control Board  
895 Aerovista Place, Suite 101  
San Luis Obispo, CA 93401

**Re: County of Santa Barbara Storm Water Management Program**

Dear Ms. Okun,

This letter provides our response to your request dated September 15, 2006 for a number of items of concern to your board, based upon the July 2006 hearing on our Storm Water Management Program. County staff has coordinated directly with Ryan Lodge on several occasions to review the discussion in this letter and the attachments provided herein. This letter summarizes that coordination.

**(1) Budget Information**

As you indicated, County staff has previously provided a budget breakdown of the Project Clean Water Program. In addition to the Project Clean Water program, implementation of the SWMP is covered by many other existing programs operating through various funding mechanisms, and managed and tracked through many separate departments. As requested in your letter, attached is a spreadsheet which identifies the construction permit fees. The fee income is used to cover the cost of plan review, inspection, and enforcement of the Grading Ordinance.

Costs associated with the "storm water ordinance, review of design standards, and other required documentation of the construction program" referenced in your letter would be paid through the storm water budget supported by the County general fund.

The \$162,139 budgeted for non-salary expenses is adequate for Year 1 of our program; additional expenses for the remainder of the permit term have not been determined by the County. Our budget is not fully developed until the spring, and ultimately must be reviewed and approved by our Board of Supervisors in May of each year. Therefore, we cannot provide your board with the expenses or funding sources anticipated for the remainder of the permit term.

Our street sweeping program is covered under the Project Clean Water budget. The FY06-07 budget for street sweeping is \$10,000. (A small amount of street sweeping occurs occasionally on an as-needed basis for public safety by Roads Division using their own equipment – those costs are not included. In addition, as described in the SWMP, the area of Isla Vista is swept by the Goleta West Sanitary District.)

In answer to your question, we expect development fees to adequately fund MCMs 4 and 5 throughout the permit term.

### (2) Maps

We have met with staff, Ryan Lodge, to review examples of the Storm Water Management Program permit area combined with aerial photography to show the urban areas vs. river bottom and agricultural lands. High resolution aerial photos with permit area overlays were reviewed with Ryan Lodge to demonstrate that the appropriate area was approved by your Board on July 7, 2006. Maps for the areas of Lompoc, Buellton, and Solvang were provided to Mr. Lodge.

### (3) Enforcement

You asked us to provide more detailed information on the County's current enforcement protocols including how the County learns of violations, violation follow-up and outcomes, complaint follow-up and outcomes including apprising the complainant of the status, tracking referrals to other agencies, and coordination among County departments. These are discussed as follows.

How the County Learns of Violations. The County learns of violations through a variety of means. These would include, but not necessarily be limited to:

- Direct calls to Project Clean Water staff
- Direct calls to the Water Quality Hotline
- Direct calls to Environmental Health Services
- Direct calls to Fire Department
- Direct calls to Sheriff Department
- Direct calls to Flood Control
- Direct calls to Planning & Development Zoning Enforcement
- Unexpected discoveries by County employees during other routine inspections and field work (see below)
- Bi-annual creek walks conducted by Project Clean Water staff

Examples of other routine inspections include:

- Environmental Health Services for inspecting food service facilities, conducted annually at all licensed facilities, and conducted as-needed where violations are noted or complaints have been directed
- Fire Department inspecting for hazardous material and waste handling operations as defined by their authority as CUPA (see SWMP page 3-14)
- Project Clean Water for regular inspections of treatment control BMP installations and other field work (minimum bi-weekly)
- Flood Control maintenance crews conducting annual creek walks within Flood Control District service areas.

Violation Follow-up and Outcomes / Compliant Follow-up and Outcomes. The attached spreadsheet was prepared to help define the process for violation follow-up and potential outcomes.

Follow-up procedures including apprising the complainant of the status vary depending on the nature of the discharge, the code violation, and the associated enforcement procedures associated with the code. A list of all County codes is shown in Table 3-2 of the SWMP (see page 3-6). Text of County codes is available at: <http://bpc.iserver.net/codes/stbarb/>

While prior analysis suggests this list of codes encompasses all possible illicit discharges as defined by the General Permit into the storm drains, and therefore provides the County of Santa Barbara with the necessary authority to implement our SWMP, during the first year of the permit term an illicit discharge ordinance will be developed to further assure your Board of that authority.

Tracking of Referrals to Other Agencies. Performance measures established under the SWMP state that the County will respond to 100% of calls to County Departments within 24 hours. Complaints outside direct County jurisdiction that are forwarded to the appropriate regulatory agency responsible for elimination of such illegal discharges will be tracked by County staff to verify course of action taken by that agency within three working days. County staff will maintain a record of that outcome in the Project Clean Water database (see attached example). Furthermore, the County is obligated under the SWMP to review complaint response protocols on annual basis to assure that abatement and enforcement measures are being implemented. If shortcomings are identified, recommendations for improved protocols will be made.

Coordination Among Various County Departments. Aside from the referral process described above, there currently is no formalized approach to coordinating illicit discharge response and follow-up internally between County Departments. This has not been identified as a problem area for the County at this time and is not a SWMP performance measure. However, we do note that MCM 6.0 for Municipal Operations includes staff training which would improve awareness of the roles and responsibilities in our illicit discharge detection and elimination program and coordination. Currently, new employees are provided a brief overview of the Project Clean Water program and County responsibilities under the NPDES General Permit.

Your letter encourages us to provide information on the number of complaints and inspections, if available. We have been keeping records since February 1999. The annual number of complaints and follow-up inspections are as follows:

<u>Number</u>	<u>Dates</u>
17	Feb 1999 – Jun 1999
57	Jul 1999 – Jun 2000
78	Jul 2001 – Jun 2002
126	Jul 2002 – Jun 2003
103	Jul 2003 – Jun 2004
68	Jul 2004 – Jun 2005
52	Jul 2005 – Jun 2006
21	Jul 2006 – present

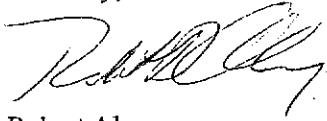

A copy of the recent entries Jul 2006 – present is provided.

(4) Construction Sites

Attached please find an example of the report that provides an index of all active construction sites. The database used to generate this report (Accela) is updated daily by staff of Planning and Development, Building Division. This report is available for public review.

We hope this letter and these attachments help address the Water Board's questions and concerns regarding the implementation of our SWMP at this time. We look forward to working with your staff to assure the County implements the SWMP consistently with the MEP standards established in the General Permit.

Sincerely,

Robert Almy  
Project Clean Water Program Manager
