

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

ORDER R5-2026-0032 – ATTACHMENT B

WATER CODE SECTION 13267 ORDER R5-2026-0032-NRP2a-XX
MODEL MONITORING AND REPORTING PROGRAM
ENACTING THE MODESTO MANAGEMENT ZONE IMPLEMENTATION PLAN
FOR DAIRIES

Background

On 3 June 2026, the Central Valley Regional Water Quality Control Board (“**Central Valley Water Board**”) adopted Order R5-2026-0032 (“**MZIP Approval Order**”), which formally approved the Modesto Management Zone Implementation Plan (“**MZIP**”) and granted an exception from the implementation of the water quality objectives (“**WQOs**”) for nitrate and other forms of nitrogen speciation (“**nitrate exception**”) to dischargers participating in the Modesto Management Zone. The MZIP Approval Order contains additional findings in support of this associated Monitoring and Reporting Program Order (“**MRP**”).

In its MZIP, the Modesto Management Zone proposed sector-based Nitrate Reduction Plans (“**NRPs**”) that describe interim milestones that certain dischargers, groups of dischargers, and/or the Management Zone or other 3rd party representative groups must achieve to satisfy the requirements of the Nitrate Control Program (“**NCP**”) and justify the continuation of nitrate exceptions for participating dischargers. In approving the MZIP Approval Order, the Central Valley Water Board issued MRPs, like this one, to create enforceable requirements for participating dischargers to implement their respective NRPs.

This MRP

This Model MRP contains requirements that incorporate interim milestones and deadlines proposed in Modesto MZIP NRP-2a as enforceable requirements for each recipient (“**Discharger**”).¹ The requirements of this MRP are in addition to those dischargers’ existing requirements under Central Valley Water Board Order R5-2013-0122, *Reissued Waste Discharge Requirements General Order for Existing Milk Cow Dairies* (“**Dairy General Order**”) and its associated MRP R5-2013-0122, and/or any

¹ Each dairy participating in the Modesto Management Zone has been issued a unique copy of this MRP R5-2026-0032-NRP2a (as indicated by number(s) following “NRP2a” in each discharger’s MRP order number (e.g., R5-2026-0032-NRP2a-01). The requirements of each of these MRPs are identical.

other applicable waste discharge requirements orders (“**WDRs**”) and/or MRPs.² (See Appendix I, Table 1.)

Most, but not all, Modesto Management Zone dairies are also members of the Central Valley Dairy Representative Monitoring Program (“**CVDRMP**”). CVDRMP is a non-profit group of dairy owners, operators and others that conducts representative groundwater monitoring on behalf of its members, conducts related assessments of dairy operational impacts to groundwater quality, and develops management practice recommendations aimed at minimizing such impacts. CVDRMP may submit reports that satisfy the requirements of this MRP on behalf of one or more dairy dischargers that would otherwise need to submit individual reports.

This Order is issued pursuant to Water Code section 13267. The reports required by this Order are necessary for the Central Valley Water Board to assess dischargers’ implementation of the NCP and compliance with the requirements of the NCP, as well as to assist in development of future phases of NCP implementation. The burden, including costs, of the required reports bears a reasonable relationship to the need therefore and the benefits to be obtained thereby.

IT IS HEREBY ORDERED, pursuant to Water Code section 13267, that the Discharger shall comply with the following:

1. **Within three years**, as part of the Annual Report required by the Dairy General Order MRP R5-2013-0122, *Annual Reporting*, have prepared an Irrigation and Nutrient Management Plan (“**INMP**”) that has been certified by a Professional Soil Scientist, Professional Agronomist, or Crop Advisor certified by the American Society of Agronomy or a Technical Service Provider certified in nutrient management in California by the Natural Resources Conservation Service (NRCS) and that incorporates, at minimum, the following information:
 - a. Identification of actions to improve performance based on the analysis of data collected as part of the previous year’s or cropping cycle’s plan, as appropriate.
 - b. Crops, cropped acreages, and yield goals.
 - c. Estimates of required N and N harvest removal.
 - d. N application schedule (mode of application, material, rate).
 - e. Description of irrigation systems, irrigation water sources and estimates of N content, irrigation schedule (based on estimates of expected evapotranspiration (ET), rainfall, and infiltration), and irrigation system maintenance procedures.

² One dairy facility, Fiscalini Farms, is regulated under individual WDRs Order R5-2008-0100, rather than the Dairy General Order.

- f. Wellhead protection procedures.
 - g. Procedures for maintaining fertigation equipment.
 - h. Description of data collection efforts, including: description of sampling procedures and other information as to how data was collected in a manner sufficient to support comparison of INMP objectives with actual conditions (e.g., yield goal vs. actual yield) and to support in-season modifications to irrigation and N application schedules.
2. **Within four years**, and annually thereafter, as part of the Annual Report required under Dairy General Order MRP R5-2013-0122, *Annual Reporting*, evaluate and report compliance with the Discharger's certified INMP and any revisions made to the INMP.
 3. Collect and report to CVDRMP any and all nitrate discharge-related data required by CVDRMP and/or the Modesto Management Zone to effectuate the Modesto MZIP and the requirements of the MZIP Approval Order. After CVDRMP's Dairy Data Management System ("**DMS**") becomes available for use, all such reporting shall be via DMS.
 4. All monitoring reports that involve planning, investigation, evaluation or design, or other work requiring interpretation and proper application of engineering or geologic sciences, shall be prepared by or under the direction of persons registered to practice in California pursuant to Business and Professions Code sections 6735, 7835, and 7835.1.

Enforcement

Failure to comply with this Order may result in the assessment of administrative civil liability of up to \$1,000 per violation per day, depending on the violation, pursuant to Water Code section 13268. The Central Valley Water Board reserves its right to take any additional enforcement actions authorized by law.

Administrative Review

Any person aggrieved by this action of the Central Valley Water Board may petition the State Water Resources Control Board to review the action in accordance with California Water Code section 13320 and California Code of Regulations, title 23, sections 2050 and following. The State Water Resources Control Board must receive the petition by 5:00 p.m., 30 days after the date of this MRP, except that if the thirtieth day following the date of this Order falls on a Saturday, Sunday, or state holiday, the petition must be received by the State Water Resources Control Board by 5:00 p.m. on the next business day. [Copies of the law and regulations applicable to filing petitions](#) may be found on the internet (http://www.waterboards.ca.gov/public_notices/petitions/water_quality) or will be provided on request.

R5-2026-0032-NRP2a-XX

If you have any questions about this Order please contact Robert Ditto at robert.ditto@waterboards.ca.gov or by phone at 916-464-4642.

This Order is effective upon the date of signature.

PATRICK PULUPA, Executive Officer
