PERMIT CA0081957
FOR SHASTA-SUSTAINABLE RESOURCE MANAGEMENT, INC.
SHASTA COUNTY**

Discharger and Tentative Order Information

Shasta-Sustainable Resource Management, Inc. (Discharger) is the owner and operator of the Shasta-Sustainable Resource Management, Inc. (Facility), which is a biomass electrical generation facility located at 20811 Industry Road, Anderson, California. The Facility discharges wastewater to the Anderson Cottonwood Irrigation District Canal, a water of the United States, tributary to the Sacramento River via Crowley Creek, Gotta Creek, Hooker Creek, Patterson Creek, and Cottonwood Creek.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5 2019-0070, adopted by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 11 October 2019. An Order is proposed to renew the National Pollutant Discharge Elimination System (NPDES) Order. The proposed permit includes a Facility name change to "Shasta-Sustainable Resource Management, Inc." under new ownership of the same name. The proposed permit also includes new effluent limitations for alpha-BHC, manganese, and molybdenum. The proposed permit and Time Schedule Order each include a compliance schedule with milestones for the Facility to come into compliance with manganese and alpha-BHC effluent limitations, respectively. The proposed permit includes changes to the onsite septic system/leachfield monitoring and stormwater management, including removal of the Fuel Pile Stormwater Pond berm, which is intended to reduce alpha-BHC, manganese, and molybdenum concentrations in the effluent. A groundwater network assessment is proposed to inform future decisions to protect groundwater quality.
