**Discharger and Tentative Order Information**

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) adopted Order R5-2019-0079, General Waste Discharge Requirements for Cold Water Concentrated Aquatic Animal Production Facility Discharges to Surface Water (CAAP General Order), on 5 December 2019. This General Order applies to individuals, public agencies, private businesses, and other legal entities that operate facilities that meet the definition of a cold water concentrated aquatic animal production (CAAP) facility, as defined in section 122.24 of Title 40 of the Code of Federal Regulations, and that discharge to surface water bodies.

The CAAP General Order expires on 31 January 2025. A proposed NPDES permit renewal has been developed for reissuance of the CAAP General Order that includes approval of new aquaculture drugs and implementation of two new policies that became effective after the 2019 permit adoption, namely the Salt and Nitrate Control Programs under the Central Valley Salinity Alternatives for Long-Term Sustainability (CV-SALTS) Program and the State Policy for Water Quality Control, Toxicity Provisions.

Existing Dischargers shall remain covered under the previous permit (Order R5-2019-0079) until: (i) a new NOA is issued for coverage under this General Order, or (ii) permit coverage is terminated pursuant to the terms of the previous permit. The Central Valley Water Board plans to issue updated Notices of Applicability to existing enrollees who submitted a completed Notice of Intent under the terms of the previous permit.
