### **Proposed Order**

If adopted, the tentative Order will revise current waste discharge requirements (WDRs) for the discharge of wastewater to land from operations at Treehouse California Almonds, LLC (Discharger) Earlimart Almond Processing Facility (Facility) located at 6914 Road 160, Earlimart, Ca 93637. The Facility is owned and operated by the Discharger and is currently regulated by Waste Discharge Requirements Order No. R5-2018-0066. The current Order authorizes a monthly average discharge of up to 0.04 million gallons per day (mgd) and a daily maximum flow of 0.09 mgd of almond

processing wastewater to 42 acres of adjacent land application areas (LAA). Changes to the wastewater treatment and disposal system have occurred at the Facility since the adoption of the current WDRs Order, and revised WDRs are necessary to reflect current operations and waste discharge to land.

The proposed WDRs Order would authorize:

- A monthly average flow limit of 0.150 mgd and an annual flow limit of 46.8 million gallons
- Treatment of the process wastewater with a new treatment system
- A new land application area totaling 66 acres
- Performance Based Salinity Limit of 950 mg/L (as fixed dissolved solids)
- Biochemical oxygen demand cycle average loading to the LAAs shall not exceed 100 lbs/ac/day
- Preparation and implementation of a Wastewater and Nutrient Management Plan
- Compliance with the Salt and Nitrate Control Programs
- Influent, effluent, and LAA monitoring, and soil monitoring

To conserve paper and reduce mailing costs, a paper copy of the proposed Order was sent only to the Discharger(s). All others may access a digital copy of the Order on the Central Valley Water Board's [Tentative Orders website](#), under the heading, "Discharger-Specific Order for Future Board Meetings"

([https://www.waterboards.ca.gov/centralvalley/board\\_decisions/tentative\\_orders/](https://www.waterboards.ca.gov/centralvalley/board_decisions/tentative_orders/)).
