PUBLIC NOTICE: PROPOSED PETROLEUM UNDERGROUND STORAGE TANK CASE CLOSURE

PUBLIC COMMENT PERIOD: 10 February through 12 April 2025

CALIFORNIA TANK LINES; 3105 SOUTH EL DORADO STREET, STOCKTON, SAN JOAQUIN COUNTY; GLOBAL ID #T0607700425

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) invites public comment on the proposed case closure of the California Tank Lines leaking underground storage tank (tank) case, located at 3105 South El Dorado Street in Stockton, CA (property). A map showing the location is attached as Figure 1.

In August 1998, the property owner removed two underground storage tanks (tanks) from the property. In September 1998, the property owner removed two 10,000-gallon diesel tanks from the property. Soil samples collected beneath the tanks contained petroleum, indicating an unauthorized release of petroleum had occurred at the property.

The property owner conducted additional investigations in November 1996 to assess the extent of petroleum contamination in soil and to determine if the release had contaminated groundwater. Between December 1999 and July 2023, multiple investigations were performed to assess the extent of petroleum contamination in soil and groundwater.

The property owner's consultant working on this project has concluded that petroleum remaining in the ground does not pose a significant threat to human health, the environment, or future property activities. The remaining petroleum in soil and groundwater will naturally break down within a reasonable amount of time. The consultant recommended case closure under California's Low-Threat Closure Policy. Central Valley Water Board staff will consider public comments during case closure review.

FOR MORE INFORMATION

You can obtain additional information on the [State Water Resources Control Board's GeoTracker website](https://geotracker.waterboards.ca.gov/) (<https://geotracker.waterboards.ca.gov/>). Please contact Vera Fischer with the Central Valley Water Board if you have any comments or questions about this Public Notice or about the environmental cleanup activities at the California Tank Lines:
