

SMALL WATER SYSTEMS PROGRAM PLAN MONTHLY UPDATE

March 2014

Summary:

The Small Water Systems Program Plan (SWSP) tracks the progress of small water systems that are in violation of a primary constituent MCL by meeting specific milestones. There are a total of **183** community water systems that have between 15 and 999 service connections listed on the SWSP. The total population targeted on the SWSP is approximately 60,000 and the total number of service connections is approximately 18,000. There are eight types of primary drinking water standards that are violated by these systems. The total numbers of water systems that are violating primary drinking water standards are: 107 Arsenic, 61 Nitrate, 11 Uranium, 2 Gross Alpha, 9 Surface Water, 2 Perchlorate, 1 DBCP, and 1 Fluoride (some systems exceed more than one standard).

Progress:

A small water system listed on the SWSP is measured on progress in returning to compliance by meeting specific milestones/goals. These milestones/goals are as follows: issuance of a compliance order, submittal of a universal pre-application for funding, placement on the Safe Drinking Water State Revolving Fund (SDWSRF) project priority list (PPL), invitation for funding, submittal of a statement of intent (SOI) to pursue funding, submittal of a funding application, execution of a funding agreement, and finally, the return of the water system to compliance by solving the problem.

Every unsolved system on the list has met the following milestones:

- Received a compliance order
- Submitted a universal pre-application for funding
- Placed on the SDWSRF PPL and invited for funding

Systems Receiving Executed Construction Funding Agreement in March 2014:

- None to report

Systems Receiving Executed Planning Funding Agreement in March 2014:

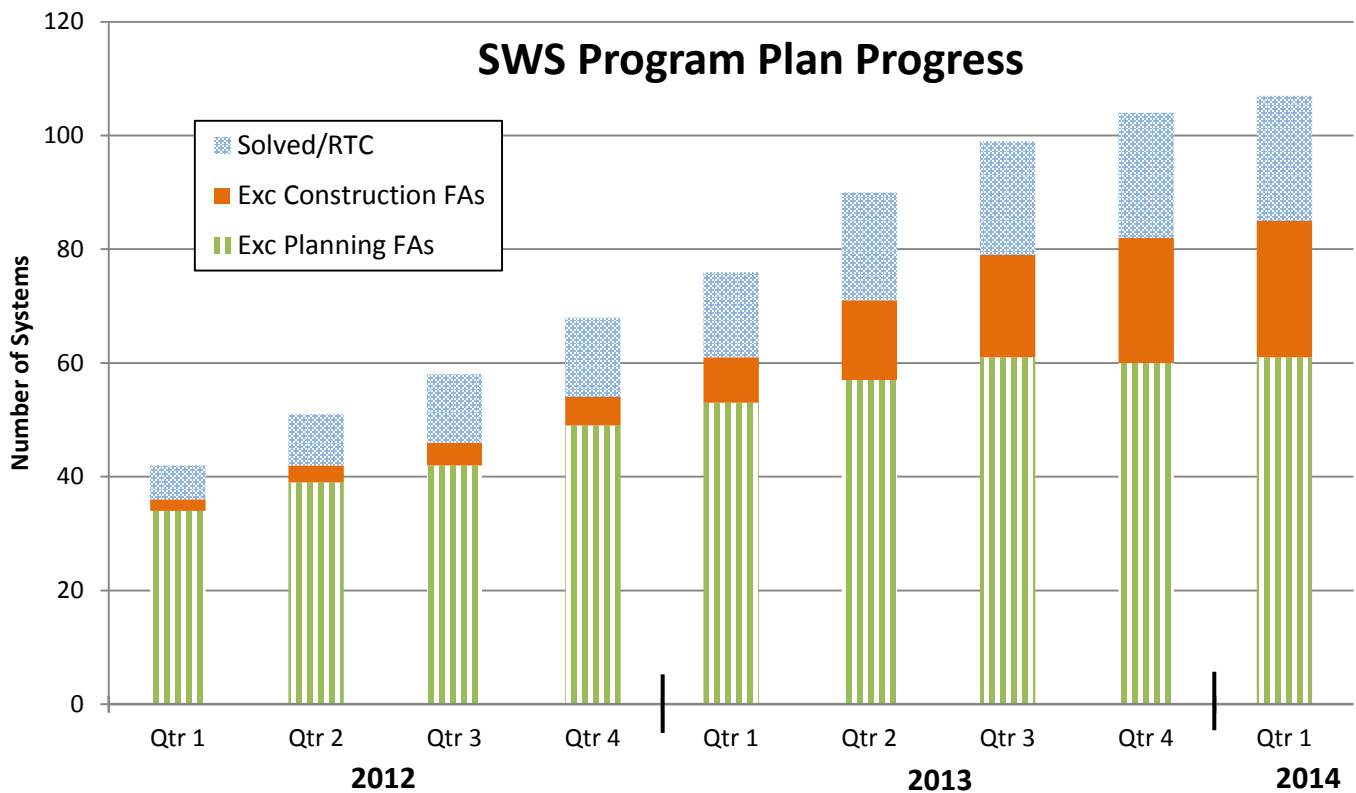

- 5200550 – New Orchard MHP (Tehama County)

Systems Solved in March 2014 :

- 3610002 – Alpine Water Users Association (San Bernardino County) – Alpine Water Users Association serves approximately 3000 people through 936 connections. The San Bernardino District Office issued a compliance order on October 31, 2011, for exceeding the uranium MCL. To address their uranium problem, the system installed ion-exchange treatment on one well while shutting off another well. Alpine Water Users Association did not request CDPH funding or technical assistance.
