Background

Norcal Water Works' inability to consistently provide safe drinking water has led the State Water Board to propose consolidation with Del Oro. Consolidation is the joining of two or more water systems. This typically is a smaller system being absorbed into a larger water system. If the consolidation occurs, the ownership of Norcal Water Work's infrastructure will be transferred to Del Oro.

Norcal Water Works is a community water system with a population of 45 residents served through 17 service connections. Norcal Water Works had multiple outstanding violations. They included failure to collect monthly routine bacteriological samples; failure to employ a water system operator; and various other violations and technical, managerial, and financial concerns.

On November 17, 2021, the State Water Board, in collaboration with the United States Environmental Protection Agency (U.S. EPA), initiated the process of mandatory consolidation to combine Norcal Water Works with Del Oro. The consolidation process requires two public meetings. The first meeting was held on January 13, 2022. The second meeting was held on September 28, 2022. This is a third meeting continuing the mandatory consolidation process.
