Subject: Electronic Transmittal: Sept 2014 CWA Report

Les--

In its September 24, 2014 Order Denying Petitions for Reconsideration and Addressing Objections, the State Water Resources Control Board (Board) requires the Department of Water Resources (DWR) and the U.S. Bureau of Reclamation (Reclamation) to “calculate and maintain a record of the amount of water conserved through the changes authorized by this Order” and to “submit such records on a monthly basis to the State Water Board within 20 working days after the first day of the following month.”

In compliance with that requirement, DWR and Reclamation (the Projects) are presenting the attached table showing daily accounting for conserved water under the Order for the month of September, along with the detailed summary below.

The May 2, 2014 version of the Order modified the Rio Vista flow requirement from 3,000 cfs to 2,000 cfs on a monthly average and from 2,000 cfs to 1,500 cfs on a 7-day average. However, September’s monthly average flow was 3,255 cfs, and the 7-day running average never dropped below 2,900 cfs. As no other modified D-1641 standards were active during the month, the Projects did not conserve any additional water in September.

In total, the TUCP Order has allowed the Projects to conserve approximately 399 TAF February through September.

If you have any questions or would like more information, please contact me at (916) 574-0456 or Mr. Paul Fujitani at (916) 979-2197.

Thank you!

Dan Yamanaka
