TENTATIVE REVISED WASTE DISCHARGE REQUIREMENTS – SCHOLL CANYON LANDFILL, GLENDALE, CALIFORNIA (FILE NO. 60-117, ORDER NO. 2001-132, CI-2846, GEOTRACKER GLOBAL ID L10009414153)

Dear Ms. Ruffell:

Section 13263 of the California Water Code provides for the periodic review and revision by the Los Angeles Regional Water Quality Control Board (Regional Water Board) of waste discharge requirements (WDRs) for an existing discharge. Regional Water Board Order No. 2001-0132 (September 19, 2001) prescribed WDRs for the Scholl Canyon Landfill (Landfill) in Glendale, California. Because WDRs for the Landfill no longer accurately reflect current conditions, we intend to revise them. Pursuant to the California Water Code and information provided in the Joint Technical Document submitted September 30, 2018, by the Discharger, tentative WDRs have been prepared.

Enclosed is a copy of the tentative WDRs consisting of:

1. Board Order No. R4-2019-0XXX specifying WDRs,
2. Monitoring and Reporting Program (CI-2846), and
3. Standard Provisions Applicable to Waste Discharge Requirements

In accordance with administrative procedures, this Regional Board will consider the enclosed WDRs and comments thereon, at a public hearing to be held at 9:00 AM on **March 14, 2019**, at the Port of Long Beach, 4801 Airport Plaza Drive, in Long Beach, California, 90815. The Regional Board will hear any testimony pertinent to this discharge, the tentative requirements, and monitoring and reporting program. It is expected that the Regional Board will take action at the hearing; however, as testimony indicates, the Regional Board at its discretion may postpone action. See the enclosed Notice of Opportunity to Comment and Public Hearing.

Written comments regarding the tentative WDRs must be received at the Regional Board office by 5:00 PM on **February 22, 2019**. Comments received after this date will not be accepted into the record unless determined by the Chair of the Regional Board not to prejudice any party or the Regional Board.
