**NOTICE OF PUBLIC HEARING
Public Notice No. 25-003**

**PROPOSED TERMINATION OF
WASTE DISCHARGE REQUIREMENTS AND
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT**

DISCHARGER	FACILITY LOCATION	RECEIVING WATER
Camrosa Water District (Camrosa Water Reclamation Facility)	1900 South Lewis Road, Camarillo, CA 93012	Calleguas Creek

The Camrosa Water District (CWD) owns and operates the Camrosa Water Reclamation Facility (WRF), a publicly owned treatment works located at 1900 South Lewis Road, Camarillo, CA. The Camrosa WRF is a tertiary wastewater treatment plant that is currently permitted to discharge up to 2.25 million gallons per day (MGD) of tertiary-treated effluent from Discharge Point 001 (34.181389°, -119.028611°) to Calleguas Creek under Waste Discharge Requirements (WDRs) contained in Order No. R4-2020-0078, adopted by the California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Water Board) on June 11, 2020. Order No. R4-2020-0078 also serves as a National Pollutant Discharge Elimination System (NPDES) permit (NPDES Permit No. CA0059501). CWD is also subject to WDRs and Water Reclamation Requirements (WRRs) set forth in Order No. R4-2019-0118 to reuse the tertiary-treated effluent from the Camrosa WRF for crop and landscape irrigation.

In a letter dated January 27, 2025, the Discharger requested termination of coverage under NPDES Permit No. CA0059501 because (1) the Camrosa WRF has sufficient storage capacity for the effluent in its four offsite ponds with a total effluent storage capacity of 26 million gallons and can utilize the ponds as emergency storage for a holding time of approximately 20 days, (2) CWD has not discharged to Calleguas Creek since February 2005, and (3) the Camrosa WRF will discharge extra treated effluent not used for recycled water applications to the Calleguas Municipal Water District's Regional Salinity Management Pipeline.

On February 20, 2025, Los Angeles Water Board staff conducted a termination inspection for Order No. R4-2020-0078 and verified that the Discharge Point 001 conveying water from Pond No. 2 to Calleguas Creek, was capped. No other discharge points were observed, consistent with the NPDES permit.

Since there are several requirements included in NPDES Permit No. CA0059501 that CWD will need to continue to meet after the termination of the NPDES permit, this Termination Order is being adopted concurrently with an amendment to WDRs/WRRs Order No. R4-2019-0118. The amendment to the WDRs/WRRs incorporates additional requirements from NPDES Order No. R4-2020-0078, including requirements for sludge

disposal, best management practices and pollution prevention, a spill clean-up contingency plan, a climate change plan, spill reporting, construction, operation, and maintenance, and additional prohibitions. In addition to requirements from the NPDES permit, volumetric reporting requirements are also being incorporated in the amendment, consistent with State Water Resources Control Board Order No. WQ 2019-0037-EXEC. The Termination Order and the Amendment to Order No. R4-2019-0118 will be considered by the Los Angeles Water Board concurrently at the same Los Angeles Water Board hearing.

On the basis of preliminary staff review and application of lawful standards and regulations, the Los Angeles Water Board proposes to terminate Order No. R4-2020-0078.
