The California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Water Board), is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within major portions of Los Angeles County and Ventura County. The Sunshine Canyon City/County Landfill (Landfill) in Sylmar, California, is regulated under waste discharge requirements (WDRs) included in Order No. R4-2008-0088 adopted by the Los Angeles Water Board on October 2, 2008. Provision M.22 of the WDRs requires: *“During oversight of this Order, wherever the Executive Officer is authorized to grant any approval under a particular provision of this Order, the Executive Officer is directed to assess if there is controversy associated with the decision following public notice and, if so, bring the decision to the Regional Board for approval.”*

THIS IS NOTICE that the Executive Officer intends to approve, as set forth in the attached draft letter, a liner design report (Report) for Phase CC-5A, at the Landfill that was submitted to the Los Angeles Water Board on December 27, 2023. Comments on this matter must be in writing, addressed to Program Manager Enrique Casas, and received at the Los Angeles Water Board office by the close of business on February 14, 2024.

The Report provides design and construction information for an approximate 15.5-acre area within the permitted footprint of the Landfill, including liner and leachate collection systems, landfill gas collection system, subdrain system, grading plans, and slope stability analyses. The Report, as well as the WDRs and other related documents are available at the State Water Resources Control Board Geotracker website at: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=L10006014618.

If you have any questions or need additional information, please contact Program Manager Enrique Casas by calling (213) 620-2299 or emailing at enrique.casas@waterboards.ca.gov.
