

**Los Angeles Regional Water Quality Control Board**

**NOTICE OF PUBLIC HEARING AND OPPORTUNITY TO COMMENT**

**TO:** Interested Persons  
**FROM:** *of for* Renee Purdy  
Section Chief, Regional Programs  
**DATE:** June 19, 2014  
**SUBJECT:** NOTICE OF PUBLIC HEARING FOR PROPOSED NON-REGULATORY AMENDMENTS TO ADMINISTRATIVELY UPDATE CHAPTER 1 "INTRODUCTION", CHAPTER 5 "PLANS AND POLICIES", AND CHAPTER 6 "MONITORING AND ASSESSMENT" OF THE BASIN PLAN

The California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Water Board) will hold a public hearing to consider adoption of non-regulatory amendments to administratively update certain chapters of the *Water Quality Control Plan for the Los Angeles Region* (Basin Plan). The purpose of this action is to administratively update Chapter 1 "Introduction", Chapter 5 "Plans and Policies", and Chapter 6 "Monitoring and Assessment" of the Basin Plan.

**Background on the Administrative Update to Chapters 1, 5, and 6 of the Basin Plan**

The current Basin Plan was adopted by the Los Angeles Water Board on June 13, 1994, and approved by the State Water Resources Control Board on November 17, 1994 and by the State Office of Administrative Law on February 23, 1995.

In 2010, the Los Angeles Water Board recognized the need for an overall update to the Basin Plan as several amendments to the Basin Plan, which had been adopted since 1994 and were in effect, had not been physically integrated into the Basin Plan. Also, the Basin Plan did not reflect current information on Los Angeles Water Board programs, plans, and policies, or more recently available geographical and background information for the Los Angeles Region. As a result, an administrative update of the Basin Plan was identified as a priority project to be addressed during the 2008-2010 triennial review (Resolution No. R10-001).

The administrative update to the Basin Plan has been conducted in phases, three of which have been completed to date. The update to Chapter 2 "Beneficial Uses" was completed in November 2011, and was followed by the addition of Chapter 7 "TMDLs" to the Basin Plan in December 2011. The update to Chapter 3 "Water Quality Objectives" was conducted in May 2013.

This fourth phase involves the administrative update of Chapters 1, 5, and 6 of the Basin Plan. Chapter 1 "Introduction" contains information on the function and the legal basis and authority of the Basin Plan, as well as background information on the Los Angeles Region to which it

applies. Chapter 5 contains summaries of all Regional and State Water Board plans and policies applicable to water quality protection in the Los Angeles Region. Chapter 6 contains a description of monitoring and assessment programs and corresponding databases designed to assess the effectiveness of the Los Angeles Water Board's water quality control programs.

The proposed administrative updates to these chapters of the Basin Plan specifically include:

- (i) Updates to background information on the Los Angeles Region in Chapter 1;
- (ii) Updates to the summaries of Regional and State Water Board plans and policies in Chapter 5;
- (iii) Updates to descriptions of monitoring and assessment programs in Chapter 6 and the addition of water quality database descriptions;
- (iv) Updates to tables in Chapters 1, 5, and 6 containing background information on the Los Angeles Region, as well as information on the Regional and State Water Board's planning and implementation programs, pertinent plans and policies, and monitoring and assessment programs; and
- (v) Updates to maps and figures in Chapters 1 and 5 to reflect current Regional Water Board program information, as well as background and geographical information.

This administrative update to Chapters 1, 5, and 6 of the Basin Plan is non-regulatory in nature and does not involve any new changes to water quality standards for the surface and ground waters of the Los Angeles Region. Neither does it modify the application of these standards or their implementation provisions. It is the next phase of a multi-step plan to administratively update the entire Basin Plan. Any regulatory updates to these chapters of the Basin Plan will be addressed in the future as separate Board actions.
