
North Coast Regional Water Quality Control Board

Change Sheet

Order No. R1-2024-0012
General Waste Discharge Requirements
For
Nonpoint Source Discharges Related to Certain Land Management Activities
On
Federal Lands in the North Coast Region

August 15, 2024

Staff Initiated Changes to the Permit

North Coast Water Quality Control Board staff made late changes to the Proposed Permit that were not identified in the Staff Initiated Changes section of the Response to Written Comments document. Underlined text in this document identifies text added to the Proposed Permit. The following changes were made to the Proposed Permit:

1. Minor modifications to the WARP Tracking Spreadsheet (Attachment C2) were made to 1) update paragraph two of the “Instructions” section to include Watershed Assessment and Recovery Program (WARP) credit multiplier instructions, 2) improve the formatting of the “Template” sections, and 3) fix an incorrect value listed in the “Sample” section.
2. Finding C.4 was added to page 6 of the Order, which now states:

Other regional water quality control boards have existing, or are currently developing, similar regulatory programs for federal land management activities. The North Coast Water Board commits to ongoing coordination with the State Water Board, other regional water boards, and the federal agencies to assess whether there could be improvements in efficiency and consistency by developing statewide standards for management of discharges from activities on federal lands, while recognizing regional differences.
