

North Coast Regional Water Quality Control Board

Notice of Proposed No Further Action

For

Louisiana Pacific Cloverdale Sawmill
Asti Road
Cloverdale, California

Case Number 1NSO476

Sonoma County

Notice Posting Date: December 5, 2024

End of Comment Period: January 4, 2025

A soil and groundwater investigation conducted at the referenced site discovered a release of petroleum hydrocarbons. Although some contamination remains, this site meets the conditions for closure under the State Water Resources Control Board's Resolution 92-49. Regional Water Board staff proposes that no further work be required. The purpose of this notice is to inform interested parties, including owners of nearby land, that the case is being considered for closure, and to invite public comment on this proposed decision.

Problem Description

A previous spill of petroleum hydrocarbons to soil and groundwater, originating from the former sawmill head rig and steam cleaner pad, was discovered in 1996 and remediated in 2003. Soil and groundwater confirmation sampling has been conducted and shown that residual contamination does not pose a significant threat to human health and the environment. No water supply wells were impacted by this contamination.
