

2022-2023 Annual Reporting Information

2022-2023 Lily Bulb Cultivation Field Map

2022 – 2023 Management Practices Table

The table below presents the tracking data for management practice implementation for fields used to grow lilies during the 2022-2023 growing season in the Smith River Plain. The data is presented by total number of fields, total acreage of fields, and the percentage of total acreage with that practice implemented. Note that the reason any given practice may not be implemented on 100% of fields is because practices are site-specific and not necessarily appropriate for every field. The grower selects the suite of Management Practices that work for each field from the checklist.

Water Quality Management Practice	Total Fields	Total Field Acreage	Percent of Total Acreage
Total Fields and Acreage	22	238	
Filter Strip	17	179	75%
Field Size Reduction	10	117	49%
Contour Farming	1	10	4%
Precision Land Forming	10	124	52%
Row Arrangement	17	188	79%
Cover Crop	0	0	0%
Enhance Soil Infiltration	22	238	100%
Critical Area Planting	8	82	34%
Soil Amendments	16	189	80%
In Furrow Dams	0	0	0%
Field Border (includes field berms)	9	99	41%
Plant Residue Tillage Management	16	189	80%
Vegetative Barrier	14	165	69%
Grassed Waterway	12	135	57%
Stormwater Diversion	15	178	75%
Field Isolation	12	133	56%
Grade Stabilization Structure	0	0	0%
Maintain Stream Setbacks	8	94	40%
Riparian Area Support	3	37	16%
Livestock Barriers	10	124	52%
Follow Dairy Nutrient Guidelines	10	124	52%
Nutrient Budget	0	0	0%
Soil Testing	0	0	0%
Irrigation Water Testing	0	0	0%
Use of Beneficial Cover Crops	10	124	52%
