Governor Brown's State Water Board Appointee Steven Moore Confirmed by State Senate

**For Release:
April 18, 2013**

**Contact: George Kostyrko
(916) 341-7365**

This week, the State Senate voted to confirm Steven Moore as a member of the State Water Resources Control Board (State Water Board), following the March 13 recommendation by the Senate Rules Committee that he serve on the board. On May 10, 2012, Governor Edmund G. Brown Jr. appointed Moore to the State Water Board.

The five member State Water Board provides comprehensive protection for California's waters. The State Water Board's mission is to preserve, enhance and restore the quality of California's water resources, and ensure their proper allocation and efficient use for the benefit of present and future generations.

"It is an honor to be appointed by Governor Brown and confirmed by the Senate," Moore said. "Water resources issues touch the lives of every Californian in numerous ways. My entire career has been focused on water, from various perspectives of biology, engineering, public agencies, non-governmental organizations (NGOs) and the private sector. I look forward to learning more about statewide water issues and applying my diverse experience to help the people of the State of California manage and address these issues of vital importance to all of us."

Moore fills the position of the civil engineer and lives in Sausalito. Moore's term expires in January 2016.

Prior to his appointment, Moore served as a civil and sanitary engineer at Nute Engineering since 2006 and had been a member of the San Francisco Bay Regional Water Quality Control Board since 2008. He served in multiple staff positions at the San Francisco Bay Regional Water Quality Control Board from 1999 to 2006 and 1992 to 1996, including water resource control engineer. He was a senior engineer at Montgomery Watson Consulting Engineers from 1997 to 1998. Moore was an environmental analyst and biologist for Earth Metrics Inc. from 1989 to 1991.

Moore earned both a bachelor's degree in Biological Sciences and a master's degree in Civil Engineering from Stanford University. Moore volunteers at his local public school to assist with water education and restoration activities, and is a member of the American Society of Civil Engineers.
