**SACRAMENTO** – This week the California State Senate voted unanimously to re-confirm Steven Moore as a member of the State Water Resources Control Board, following the June recommendation by the Senate Rules Committee that he serve on the board. On Feb. 5, Governor Edmund G. Brown Jr. reappointed Moore to this Board post. Moore was first appointed May 10, 2012, to the State Water Board, and was re-confirmed on Aug. 1.

The five member State Water Board provides comprehensive protection for California's waters. The State Water Board's mission is to preserve, enhance and restore the quality of California's water resources, and ensure their proper allocation and efficient use for the benefit of present and future generations.

"It is an honor to be re-appointed by Governor Brown and confirmed by the Senate to continue reviewing and taking action on important water resources issues before this Board," Moore said. "Water resources issues touch the lives of every Californian in numerous ways. Management of these scarce resources requires careful consideration. The impacts of climate change and our current five-year drought pose both hard choices and opportunities. I look forward to working with the State Water Board members to get this state ready for the next 50 years of water use as our population grows and our sources of water evolve and grow to serve this great state."

Moore fills the position of sanitary engineer and lives in Sausalito. Moore's term expires in January 2020.

Prior to his appointment, Moore served as a civil and sanitary engineer at Nute Engineering since 2006, and had been a member of the San Francisco Bay Regional Water Quality Control Board since 2008. He served in multiple staff positions at the San Francisco Bay Regional Water Quality Control Board from 1999 to 2006 and 1992 to 1996, as a water resource control engineer. He was a senior engineer at Montgomery Watson Consulting Engineers from 1997

to 1998. Moore was an environmental analyst and biologist for Earth Metrics Inc. from 1989 to 1991.

Moore earned both a bachelor's degree in Biological Sciences and a master's degree in Civil Engineering from Stanford University. Moore volunteers at his local public school to assist with water education and restoration activities, and is a member of the American Society of Civil Engineers.
