**TERMINATION OF COVERAGE UNDER GENERAL WASTE DISCHARGE REQUIREMENTS FOR IN-SITU GROUNDWATER REMEDIATION AND GROUNDWATER RE-INJECTION – FORMER ALLIEDSIGNAL PARK ONE SITE, 9851 SOUTH SEPULVEDA BOULEVARD, LOS ANGELES, CALIFORNIA (FILE NO. 17-105, ORDER NO. R4-2014-0187, SERIES NO. 108, CI-10367, GLOBAL ID. WDR100039776)**

Dear Mr. Wu:

On December 11, 2017, the Los Angeles Regional Water Quality Control Board authorized the proposed injection of treated groundwater under the General Waste Discharge Requirements (WDR), Order No. R4-2014-0187. The authorized discharge was part of an approved *Groundwater Extraction, Treatment, and Reinjection Pilot Test Work Plan* for groundwater remediation of volatile organic compounds at the former AlliedSignal Park One Site.

On January 17, 2020, you requested termination of coverage under the General WDR because injection of treated groundwater associated with pilot test activities was completed in July 2018. Therefore, the WDR is no longer needed for these activities. Coverage under General WDR Order No. R4-2014-0187 for the subject site is hereby terminated except for enforcement purposes. However, Honeywell International, Inc. is required to submit a Report of Waste Discharge for discharges associated with a full-scale groundwater remediation system.

IRMA MUÑOZ, CHAIR | RENEE PURDY, EXECUTIVE OFFICER

Mr. Tao Wu  
Honeywell International Inc.
