

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD  
LOS ANGELES REGION  
MONITORING AND REPORTING PROGRAM NO. 6181  
FOR  
Edgington Oil Company, Inc.  
(CA0057363)

This discharger shall implement this monitoring program on the effective date of this Order. The first monitoring report under this program is due by July 15, 1985.

Monitoring reports shall be submitted by the dates in the following schedule:

<u>Reporting Period</u>	<u>Report Due</u>
January	February 15
February	March 15
March	April 15
April - June	July 15
July - September	October 15
October	November 15
November	December 15
December	January 15

By February 15, of each year, the discharger shall submit an annual report to the Board. The report shall contain both tabular and graphical summaries of the monitoring data obtained during the previous year. In addition, the discharger shall discuss the compliance record and the corrective actions taken or planned which may be needed to bring the discharge into full compliance with the waste discharge requirements.

Each monitoring report must affirm in writing that all analyses were conducted at a laboratory certified for such analyses by the State Department of Health Services or approved by the Executive Officer and in accordance with current EPA guideline procedures or as specified in this Monitoring Program.

For any analyses performed for which no procedures is specified in the EPA guidelines or in this Monitoring Program, the constituent or parameter analyzed and the method or procedure used must be specified in the report.

If no flow occurred during the quarter the report shall so state.

The report shall state whether there was any change in the type of discharge as described in the application, during the reporting period.

Effluent Monitoring

A sampling station shall be established for each point of discharge and shall be located where representative samples of that effluent can be obtained. The following shall constitute the effluent monitoring program:

## 8. Provisions

1. This Order includes the following items of the attached "Standard Provisions": 1,2,4,5,6 8,9, and 11.
2. This Order includes the following items of the attached "Reporting Requirements": 1 and 5.
3. This Order includes the attached "General Monitoring and Reporting Provisions."
4. This Order expires on May 10, 1990, and the discharger must file a Report of Waste Discharge in accordance with Title 23, California Administrative Code, not later than 180 days in advance of such date as application for issuance of new waste discharge requirements.
5. A copy of these waste discharge specifications shall be maintained at the discharge facility so as to be available at all times to operating personnel.
6. In the event of any change in name, ownership, or control of these waste disposal facilities, the discharger shall notify this Board of such change and shall notify the succeeding owner or operator of the existence of this Order by letter, copy of which shall be forwarded to the Board.
7. Any discharge of wastes at any point(s) other than specifically described in this permit is prohibited, and constitutes a violation of the permit.
8. This order may be modified, or, alternatively, revoked and reissued, to comply with any applicable effluent limitation issued pursuant to the order the United States District Court for the District of Columbia issued on June 8, 1976, in Natural Resources Defense Council, Inc. et. al. v. Russell E. Train, 8 ERC 2120 (D.D.C. 1976), if the effluent limitation so issued.
  - (1) is different in conditions or more stringent than any effluent limitation in this order; or
  - (2) controls any pollutant not limited in this order.
9. These requirements do not exempt the operator of this waste disposal facility from compliance with any other laws, regulations, or ordinances which may be applicable; they do not legalize this waste disposal facility, and they leave unaffected any further restraint on the disposal of wastes at this site which may be contained in other statutes or required by other agencies.
10. If there is any storage of hazardous or toxic materials or hydrocarbons at this facility and if the facility is not manned at all times, a 24-hour emergency response telephone number shall be prominently posted where it can easily be read from the outside.
11. Order No. 80-19 adopted by this Board on May 19, 1980 is hereby rescinded.

7. Effluent limitation standards established pursuant to Section 301 of the Federal Clean Water Act and amendments thereto are applicable to the discharge.
8. The issuance of waste discharge requirements for this discharge is exempt from the provisions of Chapter 3 (commencing with Section 21100) of Division 13 of the public resources code in accordance with water code Section 13389.

The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations.

The Board in a public hearing heard and considered all comments pertaining to the discharge and to the tentative requirements.

This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Clean Water Act, or amendments thereto, and shall take effect at the end of ten days from the date of its adoption, provided the Regional Administrator, EPA, has no objections.

IT IS HEREBY ORDERED, that Edgington Oil Company, Inc.,

in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Clean Water Act and regulations and guidelines adopted thereunder, shall comply with the following:

A. Effluent Limitations

1. Wastes discharged shall be limited to rainfall runoff which may pick up pollutants.
2. The discharge of an effluent in excess of the following limits is prohibited:

<u>Constituent</u>	<u>Units</u>	<u>Maximum Limit</u>
Oil and grease	mg/l	15
	lbs/day*	69.7
Phenols	mg/l	1.0
	lbs/day*	4.6

\* Based on 557,000 gal per day

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD, LOS ANGELES REGION

ORDER NO. 85-27

NPDES NO. CA0057363

WASTE DISCHARGE REQUIREMENTS  
FOR  
EDGINGTON OIL COMPANY, INC.

The California Regional Water Quality Control Board, Los Angeles Region finds:

1. Edgington Oil Company, Inc., discharges wastes under waste discharge requirements contained in Order Nos. 75-106 and 80-19 (NPDES Permit No. CA0057363) adopted by this Board on August 18, 1975 and May 19, 1980 respectively.
2. Edgington Oil Company, Inc., has filed a Report of Waste Discharge and has applied for renewal of its waste discharge requirements and National Pollutant Discharge Elimination System Permit.
3. Edgington Oil Company, Inc., operates a petroleum refining facility at 2400 East Artesia Boulevard, Long Beach, California, and discharges up to 557,000 gallons per day of rainfall runoff which may contain pollutants. The waste is rainfall runoff from outside of process areas only and is not commingled with process waste. The wastes flow to an oil-water separator and then to a 210,000 gallon holding tank. The initial portion of rainwater run-off is held and analysis is performed prior to discharge. The wastes are discharged to the Los Angeles River, a water of the United States, via storm drains in Orange Avenue and 59th Street, at a point about 1,600 feet northeasterly of Long Beach Boulevard Bridge, above the tidal prism.
4. The loading racks, pump operations, and tank areas are diked and the rainfall runoff from these areas along with all sewage and process wastewater is discharged to the sanitary sewer system.
5. The Board adopted a Revised Water Quality Control Plan for Los Angeles River Basin on November 27, 1978. The Plan contains water quality objectives for Los Angeles River. The requirements contained in this Order, as they are met, will be in conformance with the goals of the Water Quality Control Plan.
6. The beneficial uses of the receiving waters are groundwater recharge; non-contact water recreations; and (within the tidal prism) industrial service supply; water contact recreation; ocean commercial and sport fishing; preservation of rare and endangered species; marine habitat; and saline habitat.
