TERMINATING WASTE DISCHARGE REQUIREMENTS
AND
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT
FOR DISCHARGE IN THE LOS ANGELES REGION

The California Regional Water Quality Control Board, Los Angeles Region (Regional Water Board), finds:

1. This Regional Water Board adopted waste discharge requirements for discharges to surface waters which also served as the National Pollutant Discharge Elimination System (NPDES) permit for the Discharger listed below.
2. The Discharger has eliminated the discharge of oily wastewaters through the outfall. The Discharger filed a Notice of Intent (NOI) with the State Water Board for the discharge of storm water at the facility. The facility has been enrolled under the General Industrial Storm Water Permit since January 2014.
3. Therefore, the following waste discharge requirements and NPDES permit are no longer necessary and should be terminated.
4. The following Order is hereby terminated, except for enforcement purposes.
5. The termination of waste discharge requirements is exempt from the provisions of Chapter 3 (commencing with Section 21100), Division 13, Public Resources Code, in accordance with Water Code Section 13389.

The Regional Water Board has notified the Discharger, interested agencies, and persons of its intent to consider termination of the following waste discharge requirements and has provided them with an opportunity to submit their written views and recommendations.

The Regional Water Board, in a public hearing, heard and considered all comments and testimony pertinent to this matter.

IT IS HEREBY ORDERED that the following waste discharge requirements and NPDES permit be terminated:

DISCHARGER NAME (NPDES NO.)	ORDER NO. (ADOPTION DATE)	REASON FOR TERMINATION
Defense Logistics Agency (formerly called Defense Energy Support Center), Defense Fuel Support Point, Pier 12 Marine Terminal (CA0060496)	Order No. R4-2008-0025 (May 1, 2008)	The facility has completed modifications that eliminate the discharge of oily wastewater through the outfall. The discharge of storm water at the facility is currently covered by a general industrial storm water permit.
