

ATTACHMENT F

Manure Management Plan (MMP)

1. Ensure adequate of storage of manure, litter, and process wastewater, including the procedures to ensure proper operation and maintenance of the storage facilities;
2. Ensure proper management of mortalities (i.e., dead animals) to ensure that they are not disposed of in a liquid manure, storm water, or process wastewater storage or treatment system that is not specifically designed to treat animal mortalities.
3. Ensure that clean water is diverted, as appropriate, from the production area;
4. Prevent direct contact of confined animals with waters of, or waters tributary to, the United States;
5. Ensure that chemicals and other contaminants handled on-site are not disposed of in any manure, litter, process wastewater, or storm water storage or treatment system unless specifically designed to treat such chemicals and other contaminants;
6. Identify appropriate site-specific conservation practices to be implemented, including as appropriate, buffers or equivalent practices to control runoff of pollutants to waters of the United States; and
7. Identify site-specific records that will be maintained to document the implementation and management of the minimum elements described in items (i) through (viii).

The Discharger is required to submit a statement with each annual self-monitoring report confirming that Fairplex has not land-applied any manure or wastewater during that year. However, if the Discharger wishes to land-apply manure or process wastewater, the Discharger shall notify the Regional Board and develop a NMP that incorporates all the elements specified in Attachment A in accordance with 40 CFR section 122.42(e)(1).
