LOS ANGELES REGION  
320 West 4th Street, Suite 200, Los Angeles, California 90013

FACT SHEET  
WASTE DISCHARGE REQUIREMENTS  
FOR  
CITY OF INGLEWOOD  
(GROUNDWATER WELL AT 107<sup>TH</sup> STREET AND YUKON AVENUE)

NPDES NO. CAG994001  
CI-8235

**FACILITY ADDRESS**

3600 W. 107<sup>th</sup> Street  
Inglewood, CA 90301

**FACILITY MAILING ADDRESS**

One Manchester Blvd., 3rd Floor  
Inglewood, CA 90301

**PROJECT DESCRIPTION**

The City of Inglewood proposes to construct a water supply well at the above-referenced site. Water from the well will be evaluated for use as a source of potable water. Groundwater generated from constructing the well and from periodic pumping tests of the well will be discharged to the Dominguez Channel.

**VOLUME AND DESCRIPTION OF DISCHARGE**

Water will be discharged intermittently at a discharge rate not to exceed 500 gallons per minute or 720,000 gallons per day. Discharge will be into the Dominguez Channel at 33° 56' 18"N, 118° 20' 05"W. The discharge into the Dominguez Channel flows to the Los Angeles Harbor, a water of the United States.

**FREQUENCY OF DISCHARGE**

Discharge during the initial well testing will occur for approximately 24 to 48 hours. Thereafter, during normal pumping operation, discharge will be intermittent and will occur for approximately 8 to 12 hours.

**REUSE OF WATER**

Because of the intermittent nature of the discharge, there is no feasible reuse option for the water at the site.
