**TERMINATION OF COVERAGE FOR GENERAL WASTE DISCHARGE REQUIREMENTS,
FORMER DEAN-ALCO INDUSTRIES, 5930 WEST JEFFERSON BLVD., LOS ANGELES,
CALIFORNIA (ORDER NO. R4-2002-0030, SERIES NO. 027, CI-8598)**

Dear Mr. Meyer:

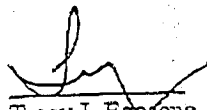

In our letter dated June 13, 2003, we informed you that the subject discharge is regulated under Order No. R4-2002-0030, Series No. 027, which serves as your Waste Discharge Requirements (WDR).

Regional Board staff has reviewed the *Request for Termination of Waste Discharge Requirements Permit* letter dated February 10, 2009 for termination of Hydrogen Release Compound (HRC) injection under the above-referenced Order at the Former Dean-Alco Industries property (Site). The Regional Board approved a remediation action plan (RAP) addendum for source zone enhanced anaerobic bioremediation (EAB) of groundwater using HRC technology. The RAP was implemented at the Site between September 2003 and February 2005. No additional HRC injection has been conducted since February 2005.

Based on the most recent groundwater data, Regional Board staff concludes that further HRC injection and groundwater monitoring related to the WDR is not necessary at the Site. Therefore, the current WDR Permit is no longer required and Regional Board WDR Order No. R4-2002-0030, Series No. 027 for the Site is hereby terminated at this time.

If you have any questions, please contact the Project Manager, Mr. Steve Rowe at (213) 576-6755 or srowe@waterboards.ca.gov, or Mr. Adnan Siddiqui at (213) 576-6812.

Sincerely,

Tracy J. Egoscue
Executive Officer
