**WASTEWATER SYSTEM DESCRIPTION**

Geoffrey's Malibu is a restaurant operated by Peterson Enterprise, LLC (hereafter, the Discharger). The restaurant is located at 27400 Pacific Coast Highway, Malibu. The restaurant was initially part of a motel built in the 1949-1950 timeframe. The restaurant is adjacent to the pool area of this motel and the land upon which the restaurant is located, is owned by Holiday House, LLC. The restaurant is located between Pacific Coast Highway and Escondido Road on a narrow strip of land overlooking the Pacific Ocean. The grease trap and two septic tanks are located beneath the parking lot for the restaurant.

The existing septic system consists of a 4000-gallon grease trap with 3750-gallon and 4500-gallon septic tanks which discharge to seepage pits of 5-foot diameter and 10-foot depth below a 2-foot surface cap. The five seepage pits are located beneath Escondido Road at an elevation of + 23 feet mean sea level (msl). These seepage pits have less than 50 feet setback from Escondido Beach, and discharge at a depth of 12 feet below ground surface (bgs), which is only + 9 feet from mean high-tide.

**VOLUME AND DESCRIPTION OF DISCHARGE**

The Discharger estimated the average discharge volume as 3000 to 6000 gallons per day (gpd). However, Geoffrey's Malibu is a 90 seat restaurant; using the Uniform Plumbing Code standard of 50 gallons per seat, the discharge volume would be 4500 gpd (90 seats X 50 gallons per seat). The Discharger estimates that the discharge volume is 10,000 gpd to 11,000 gpd on weekends and during the summer. Geoffrey's Malibu restaurant is located at Latitude: 34° 01' 39" and Longitude: 118° 46' 06".
