TERMINATION OF WASTE DISCHARGE REQUIREMENTS FOR FORMER INTERNATIONAL LIGHT METALS FACILITY, 19200 S. WESTERN AVENUE, TORRANCE, CALIFORNIA (ORDER NO. R4-2008-0009, CI-9016, FILE NO. 06-001, GLOBAL ID WDR100000690)

Dear Mr. Giraudi:

Our letter of December 13, 2011, transmitted a tentative order to terminate Waste Discharge Requirements (WDR), Order No. R4-2008-0009, for conducting a pilot study to evaluate the potential of using bioaugmented bioremediation to destroy chlorinated volatile organic compounds (VOCs) in shallow groundwater at the former International Light Metals facility located at 19200 S. Western Avenue, Torrance, California.

Pursuant to Division 7 of the California Water Code, this Regional Board at a public meeting held on February 2, 2012, reviewed the tentative order, considered all factors in the case, and adopted Order No. R4-2012-0024 (a copy is enclosed) relative to the termination of the WDR. No written comments were received related to the termination of the WDR.

If you have any questions or need additional information, please contact the Project Manager, Mr. David Koo at (213) 620-6155 or me at (213) 576-6683.

Sincerely,

Eric Wu, Ph.D., P.E.
Chief of Groundwater Permitting Unit

Enclosure: Order No. R4-2012-0024

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION

ORDER NO. R4-2012-0024

TERMINATION OF WASTE DISCHARGE REQUIREMENTS
FOR DISCHARGES TO LAND/GROUNDWATER
(TRC Solutions, Inc. – Former International Light Metals Facility)

The California Regional Water Quality Control Board, Los Angeles Region (Regional Board) finds:

1. On March 6, 2008, this Regional Board adopted Waste Discharge Requirements (WDR) contained in Order No. R4-2008-0009 for TRC Solutions, Inc. (Discharger) to conduct a pilot study to evaluate the potential of using bioaugmented bioremediation to destroy chlorinated volatile organic compounds (VOCs) in shallow groundwater at the former International Light Metals facility located at 19200 S. Western Avenue, Torrance, California.
2. On October 12, 2011, the Discharger notified the Regional Board that the pilot test to evaluate bioaugmented bioremediation at the former International Light Metals facility was completed in August 2009 with the final pilot test report submitted on October 21, 2009, to the Department of Toxic Substances Control (DTSC). An approval letter for completion of the pilot test was issued by the DTSC on March 2, 2010 and the last semi-annual groundwater monitoring report was submitted in April 2011 to the Regional Board.
3. Because the pilot test has been completed, the Regional Board finds that Order No. R4-2008-0009, with waste discharge requirements, is no longer applicable and shall be terminated, except for enforcement purposes.
4. The termination of Order No. R4-2008-0009 is exempt from the provisions of Chapter 3 (commencing with Section 21100), Division 13, Public Resources Code, in accordance with California Water Code (CWC) section 13389.

The Regional Board has notified the Discharger and interested agencies and persons of its intent to consider termination of Order No. R4-2008-0009, and has provided them with an opportunity to submit comments.

The Regional Board, in a public hearing, heard and considered all comments and testimony pertinent to the Order.

IT IS HEREBY ORDERED that Order No. R4-2008-0009 is terminated, except for enforcement purposes.

February 2, 2012

TRC Solutions, Inc.
Former International Light Metals Facility
Order No. R4-2012-0024

The Executive Officer of this Regional Board is authorized, and is hereby directed, to certify and submit copies of this Order to the Discharger, and to such individuals and governmental agencies that request it.

I, Samuel Unger, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Los Angeles Region on February 2, 2012.

Samuel Unger, P.E.
Executive Officer
