CERTIFIED MAIL
RETURN RECEIPT REQUESTED
CLAIM NO. 7002 2030 0006 2095 2798

Dear Ms. Jones:

GENERAL WASTE DISCHARGE REQUIREMENTS FOR SMALL COMMERCIAL SUBSURFACE SEWAGE DISPOSAL SYSTEMS – CEMEX CONSTRUCTION MATERIAL, L.P., 9035 ROSELAND AVENUE, MOORPARK, CALIFORNIA (FILE NO. 06-128 CI-9124)

We have completed our review of your application for Waste Discharge Requirements to discharge wastewater from CEMEX Construction Material, L.P. in the City of Moorpark.

CEMEX Construction Material, L.P (Discharger) owns 533 acres and operates sand and gravel quarry to manufacture selects rock products and ready mixed concrete. The site is located between Happy Camp Canyon and Grimes Canyon, north of Arroyo Las Posas and south of the Santa Clara River, in the eastern Ventura County (Figure 1). The facility consists of rock plant, concrete batch plant, repair facility, scale, administration offices, two process water ponds and two septic tank systems (Figures 2 and 3). The Discharger proposed to build a new modular office in support of up to twenty-one administrative staff, and an individual sewage disposal system to service the new modular office. One of the existing septic systems consists of two septic tanks with a total capacity of 4,000 gallons connected to a single leach field. The second existing system is comprised of a single 1,250-gallon septic tank leach field. The proposed new septic disposal system will include a 1,000-gallon septic tank and a seepage pit.

The Discharger has estimated that a maximum of 1403 gallons per day of domestic wastewater will be discharged from the existing and proposed septic tank systems that service approximately sixty-one staff people. Groundwater beneath the site is estimated to be present at a depth of approximately 1000 feet below ground surface.

Regional Board staff have reviewed the information provided and have determined that the proposed discharge meets the conditions specified in Order No. 01-031, "General Waste Discharge Requirements for Small Commercial and Multifamily Residential Subsurface Sewage Disposal System," adopted by this Regional Board on February 22, 2001.

The two existing septic systems have been regulated under individual Waste Discharge Requirements, Order No. 83-16, adopted by this Regional Board on March 28, 1983. The existing Order No. 83-16 is in the revision process and the two existing septic systems and the proposed new septic system will be regulated under Order No. 01-031. The enrollment under this general permit (Order No. 01-031) is only for disposal of the domestic wastewater only and there shall not

California Environmental Protection Agency

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption
For a list of simple ways to reduce demand and cut your energy costs, see the tips at: <http://www.swrcb.ca.gov/news/echallenge.html>

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.

be any other waste discharge through the septic systems. The discharge of process wastewater will be regulated under the revised waste discharged requirement of Order No. 83-16.

Enclosed are your Waste Discharge Requirements, consisting of Order No. 01-031 and Monitoring and Reporting Program No. CI-9124.

The "Monitoring and Reporting Program" requires you to implement the monitoring program on the effective date of coverage under this permit. All monitoring reports should be sent to the Regional Board, ATTN: Information Technology Unit.

When submitting monitoring or technical reports to the Regional Board per these requirements, please include a reference to Compliance File No. CI-9124, which will assure that the reports are directed to the appropriate file and staff. Also, please do not combine other reports with your monitoring reports. Submit each type of report as a separate document.

We are sending a copy of Order No. 01-031 only to the applicant. Copies of the Order will be furnished to anyone who requests it.

If you have any questions, please contact Mr. Orlando H. Gonzalez at (213) 620-2267.

Sincerely,

Jonathan Bishop
Executive Officer
