NOTICE OF TERMINATION OF ORDER NO. R5-2015-0012-0063, PG&E DAVIS SERVICE CENTER, 316 L STREET, DAVIS, YOLO COUNTY

On 23 July 2023 the Executive Officer of the Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) issued a Notice of Applicability (NOA) under Order No. R5-2015-0012, *Waste Discharge Requirements General Order for In-Situ Groundwater Remediation and Discharge of Treated Groundwater to Land* (General Order) for the Pacific Gas and Electric (PG&E) Davis Service Center facility at 316 L Street in Davis (Site). Under the General Order, PG&E was assigned site-specific NOA and monitoring and reporting program (MRP) No. R5-2015-0012-063 for its in-situ groundwater remediation activities at the Site.

The in-situ groundwater remediation consisted of injecting approximately 10,548 pounds of EHC®, which equates to approximately 7,271 gallons of EHC® slurry, into 19 injection points at the Site. EHC® is a proprietary formula consisting of zero-valent iron (ZVI) and a carbon substrate, and is used to promote in-situ chemical reduction at the injection sites. The slurry is a mixture of EHC® and water. The injections occurred between 9 and 18 August 2022. No further injections are planned for the Site. Based on the evaluation of the water quality data in the injection and treatment zones, Central Valley Water Board staff concur with the request to terminate the Site's coverage under the General Order. PG&E will continue monitoring of Site media as appropriate in accordance with the 20 March 2020 *Corrective Action Work Plan*.

The Notice of Applicability and the MRP requirements under R5-2015-0012-063 are hereby terminated as of the date of this letter. If you have any questions, please contact Maxine Cottrell at (916) 464-4623 or via email at maxine.cottrell@waterboards.ca.gov.
