NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM
PERMIT CA0079588**

**FOR
CITY OF RIO VISTA
BEACH WASTEWATER TREATMENT FACILITY
SOLANO COUNTY**

Discharger and Tentative Orders Information

The City of Rio Vista (hereinafter, Discharger) is the owner of the Beach Wastewater Treatment Plant (hereinafter, Facility), located at 1000 Beach Drive, City of Rio Vista, CA, 94571. The U.S. Army Corps of Engineers owns the property on which the Facility is located and has granted the Discharger a right-of-way in order to operate and maintain the Facility on this property. Veolia Water Company is the Facility operator. The Discharger provides sewerage service for the City of Rio Vista and serves a population of approximately 4,400. The design average dry weather flow capacity of the Facility is 0.65 MGD and the design peak wet weather flow capacity is 2.3 MGD. Disinfected-secondary treated municipal wastewater is discharged at Discharge Point 001 to the Sacramento River, a water of the United States within the legal boundary of the Sacramento-San Joaquin Delta.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2019-0016 (NPDES Permit), issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 8 February 2019. An Order is proposed to renew the NPDES permit.

The proposed Order includes new or updated effluent limitations for copper, lead, arsenic, ammonia, chlorodibromomethane, and dichlorobromomethane. The proposed Order removes effluent limits for silver, cyanide, acute whole effluent toxicity, and electrical conductivity. The proposed Order also requires the Discharger to initiate actions over the next permit term to develop an approved industrial pretreatment program at the Facility, unless progress is made to regionalize with the City of Rio Vista Northwest Wastewater Treatment Facility.
